

Short Essay & Video - POSITION: Research Officer Ivan Coste-Manière (FRA)

I have been lucky enough to be invited or selected every year for the 10 past years. Olympia is now definitely known to me and the leading officials have even been invited at my place last year. I think this year is crucial now that the Président of the IOA has been elected President of the Hellenic Olympic Committee : my other international activities should be useful for so many moving strategic shifts and I will be in Olympia and Athens 6 times this year, pushing the IOA Olympic Museum project.

For the other position I have been not only strengthening all the relationships which could be boosted in countries I am visiting for my professional activity in close relationship with the universities and the local national Olympic committee (Research officer) and I have been launching the IOAPA Masterclass series...being happy to run for this position again too. As for today more than 750 publications.
