

117000-H: MEDICAL RAIL

GENERAL

In general, follow the guidelines below when designing and specifying medical rail systems. Unless specifically indicated otherwise, these guidelines are not intended to restrict or replace professional judgment.

STANDARDS

The product installed at University Hospital was Fairfield Medical Rail. In renovation projects, specify a Fairfield compatible Medical Rail. Medical rail systems should be selected to meet the needs of MM staff, including Nursing, Maintenance and Respiratory Therapy. Compatibility with existing rails and equipment is necessary.

Typically the medical rail is Owner Furnished (via Capital Equipment) and Contractor Installed. The attachment clips are Owner Furnished and Installed.
