

### **Disclaimer and Notes:**

- This pattern was **assembled** by me rather than made, I did make/adjust some bits but for the most part, all the pieces in this pattern were sourced from other free patterns which you will find under the credits! I couldn't find a solid baphomet doll pattern for free that was written, clear, included all the parts, etc so I found different baphomet patterns for free as well as some other minor patterns to assemble this one!
- This pattern is written with US terms
- For the bits made with circular rounds, you can work in spirals or join the rounds depending on the look you want, I worked in spirals
- I hope this helps, sorry if the instructions aren't the clearest I did my best </3

### **Materials:**

- Yarn: red and black yarn DK weight (or whatever weight and colors u want :3)
- Hook: 2.5mm (a 2.5mm hook with DK weight yarn made about a 5 inch/12.7 cm tall plush WITHOUT the horns and 8 inch/20 cm plush WITH horns! Feel free to use whatever size hook you want to best suit your yarn and the goal size of the plush)
- Other stuff:
  - 10mm safety eyes (or bigger/smaller depending on desired plush size)

  - Sewing pins

14. Sc around
15. Sc around
16. Sl st, fasten off (this will be the "cord")
17. Take the black yarn and wrap it around your hand 6-8 times and cut
18. Bring both ends of the yarn together on one side and hold the connected end on the other side, then fold the connected end over the cut end, repeat until the cluster of yarn is double the length of how you want the actual tail to look
19. Pull one end of the cluster through the last row of the tail cord so that they are intersecting, there should be an even-ish amount of the yarn cluster on either side of the tail cord
20. Take all the loops on one end of the cluster and pull it through all the loops on the other side and tighten

21. Cut the loop ends you just pulled through so that they are strands instead of loops (do not cut it perpendicularly, you are not trying to shorten the tuft just separate the loops!)
22. Brush out the strands to create the “tuft” of fur at the end of the tail
23. **Note:** Sorry this part is a bit confusing, if you’re still lost, just follow this tutorial starting at 1:21:28 [https://youtu.be/\\_kjonvaKvRg?t=4888](https://youtu.be/_kjonvaKvRg?t=4888)

### Assembly and stuff

**Note:** it helps to pin the parts together before sewing them on!

1. Sew the head to the body lining up the closed off end with the opening on the narrower end of the body (it looks huge I know but trust the process)
2. Sew on the muzzle below row 13 parallel to the eye space, stuff bits inside the muzzle as you sew it on
  - a. If you’d like, sew a Y-shape with black thread/yarn on the muzzle to give it the nostrils
3. Sew on horns on top of head, for me they took up rows 3-8 on both sides but you can sew them as you wish
4. Sew on ears below the horns on either side
5. A few rows down from where the head meets the body, find the vertical center of the body’s backside, place a pin, and sew wings on opposite sides of the pin (keep the pin in to keep a center point for the tail)
6. Sew on arms close to where the head meets the body on both sides, towards the front
7. Sew on the legs at the front of the doll towards the bottom rows (sit the plush down and see how it sits best without falling, pin the legs when you find where they work best to support the doll) on both sides
8. Using the pin from step 5 as reference, sew on the tail towards the bottom of the back
9. **Optional:** if you’d like, you can sew on a pentagram or a pentagon on the forehead as some others have done, but that’s up to u :))
10. Sew in/hide all ends and you should be solid!
