Review form

Article title:

	EVALUATION CRITERIA	**REVIEWER'S COMMENTS**
1	Is the publication scientific and relevant to the journal?	
2	Correspondence of the title and annotation of the content of the article. The volume of the abstract is 1800 characters without spaces (250-300 words). The following annotation structure is required: Purpose, Methods, Results and Conclusions.	
3	Does the article take into account previous research by other scientists on the presented problem? Are the latest researches of Ukrainian and foreign scientists (for the last 5 years) covered? Are there references to foreign language sources (at least 30%)? What works should be mentioned within the research problem?	
4	Compliance of the conclusions with the purpose and objectives of the study, their validity and persuasiveness	
5	Correctness of registration of article (scientific style, terminology, the presence of all structural elements of the article: introduction (relevance, purpose and objectives of the article); methods; results and discussion; conclusions.).	
6	Is the list of References correctly compiled? References in the style of APA. A scientific review of publications for the last 5-7 years is mandatory. The minimum number of cited sources is 15 for empirical articles, for theoretical - 25.	

7	Are the works of scientists mentioned in the content of the article listed in the references? It is not allowed to list the names of scientists, only with references to their work	
8	Does the article have theoretical and practical significance? What exactly?
