► Description_____

[[Image Link](#)] On face Value Darth Tharax comes across as a weak, 5'7, blind one-armed woman who isn't much of a threat to anyone. Even the way she walks with her 'walking staff' is relatively timid, like some cooky witch from a backwater planet. But in reality, it is all an act of trickery and deception to hide her true power.

► Brief History

A Sith, born from a cloning program to rein as the next dark lord Omen was a trailblazer for the former Empire, fast, strong, gifted in the force and wise beyond her years. Born to lead her legacy was cut short as a tragic accident that almost killed her and left her a crippled wounded shell of her former self. Blind, one-armed and her senses dulled she was unable to fulfil her designed legacy, and instead offered retirement for her deeds to the Empire in such a short time. Castaway and secluding herself on the plant of Dathomir, her and her new esteemed apprentice plotted and planned for schemes that were not to pass as the war in the galaxy took hold.

Wise enough to fathom the damage it could have done Omen sought out her sister, or at least what remained of her, before taking the small group of sith away. Calling in favours and life debts the witch managed to get them a place on Home-1, due to her ties to its captain, providing safety and a home for the group. In time, with the Sith but scattered to the winds she declared herself 'Dark Lord' and the stolen title of 'Darth Tharax', amassing followers and like-minded individuals to take control of the service corridors in the lower decks.
