

Halloween Slime

1 bottle Elmer's glitter glue
1 cup + 1 tablespoon warm water, separated
1 teaspoon borax

Add the glitter glue to a medium bowl. Add one tablespoon of water and mix until combined. In a small bowl or measuring cup, stir the borax into the remaining cup of water. Pour the borax water into the glitter glue, and mix with your hands until the slime starts to come together. Pull the slime out of the water and squeeze from hand to hand until the slime reaches the desired consistency. Store in an airtight container.
