

Exploring intersections of SCIENCE & JUSTICE?

UC SANTA CRUZ SCIENCE & JUSTICE RESEARCH CENTER

Graduate students interested in taking part in the Science & Justice Training Program (SJTP) and the Winter 2024 Science & Justice graduate course (the gateway to the SJTP) are highly encouraged to join us for an informational meeting.

Graduate students from all departments are encouraged to attend!

December 06, 2023 SJTP Informational Meeting 12:00-1:00 PM

Graduate Student Commons Fireside Lounge + Zoom ([registration](#))

The Science & Justice Training Program (SJTP) trains science and engineering graduate students alongside social science, humanities and arts graduate students. The ***Science & Justice: Experiments in Collaboration*** seminar is the **introductory course in the Training Program** and draws together early career PhD students and senior faculty from across all five divisions to foster experimental collaborative research practices. The SJTP offers a unique opportunity for students to learn to work together to explore how questions of science and knowledge meet questions of ethics and justice. Students gain experience designing innovative research and organizing and hosting colloquia. They also gain access to project or event funding and mentorship and training.

Offered: BME/CRES/FMST/SOCY 268A

Mondays 2:30pm - 5:30pm, Rachel Carson College 301, Assistant Professor Kriti Sharma.
