

Senior Full-stack Engineer

Are you an experienced full-stack engineer who loves elegant code and clean architecture? Are you fluent with Ruby, Rails, JavaScript, and take great care in the design and maintainability of server-side API's? RemoteLock™ is looking for talented full-stack engineers to help us grow our enterprise-class product line of IoT access control devices and web & mobile software.

A Day in the Life:

Upon learning about our RemoteLock™ door security products and management/reporting software, you will utilize these skills to implement customer facing features as well as integrate third party services and hardware.

Here are some specifics on exactly what your days might look like:

- Execute and own an individual feature end-to-end (e.g. from distributed service to Frontend)
- Collaborate with the product manager on requirements gathering and task breakdown
- Lead the discovery of a potential integration with a third party service or device
- Support our existing products and services and make recommendations for with respect to our commitment to continual improvement

If you meet the following requirements, we definitely want to hear from you:

5+ years work experience in software development with an ability to demonstrate the following traits and characteristics:

- Expert with Ruby & Rails
- Expert with JSON & XML
- Proven RESTful API Integration experience is required
- Familiarity with at least one JavaScript framework (e.g. Angular, Ember, Backbone)
- Strong experience with an SQL RDBMS and proper database design
- Ability to write unit and integration tests for automated regression testing purposes
- Strong experience developing and supporting scalable, highly-available backend services
- Strong source code management experience, especially with Git
- Ability to deal with multiple projects/deadlines and manage shifting priorities

- Solid analytical and problem-solving skills with a high attention to detail
- Excellent communication skills (both written and verbal)
- High coding standards: Adherence to common idioms and best practices of the tech stack
- Ability to learn new concepts and technologies on an independent basis

Bonus points for experience with:

- IoT/embedded devices
- GraphQL
- gRPC
- Amazon Web Services
- Microservice Architecture
- DevOps experience

Our Interview Process:

- Take-home coding challenge (very practical, not a puzzle)
- Thirty minute introductory video call
- One hour technical video call with two senior engineers
- Video cultural interview with VP of Engineering

Culture:

RemoteLock is a company with a 10-year track record of success and a start-up mentality. We are fanatical about getting the right things done in a detailed and dependable manner. We are experts in the field with the humility to improve every day. We embrace challenges with open and honest communications and have the courage to always do the right thing. We value a healthy work-life balance and have fun being ourselves and serving our client base.

About RemoteLock™

Imagine using your phone to unlock the doors on your business or property and monitor who enters from halfway around the world. Whether managing automated guest and maintenance access, to a vacation rental property, or the IT assets of a Fortune 50 enterprise, RemoteLock is securely opening doors 100+ million times a year from the cloud.

RemoteLock is a leading provider of cloud-based access control and smart lock management software. Our cloud-based application, EdgeState, consolidates connected locks on an easy-to-use SaaS solution enabling customers to remotely control access for guests, employees and support staff, saving time, money and manpower.

We strive to continually perfect the connection between people, places and things with software and devices that greatly simplify access control

RemoteLock™ attracts and retains only top-notch employees – we recruit for high talent, low egos. We offer a competitive compensation package including salary, equity, bonus, medical/dental/vision, 401(k), PTO/Flextime, quarterly celebration events, stocked kitchen, dog friendly office, RTD EcoPass & remote work options. We are headquartered in a trendy office warehouse at the Evans Light Rail station in Denver with a global workforce and over 50k connected devices worldwide.

RemoteLock is headquartered in Denver, CO, and was recently recognized as one of Colorado's Top 50 Companies to Watch and 2018 Denver Gazelle. Learn more at www.remotelock.com.
