

Pika Release Notes 2023.02.0

Deployed 6/6/2023

New Functionality

- MLN1 Patron Password Implementation ([Minute 4:03](#))
 - Pre-populate Pika database with default passwords to make using masquerade easier for Library staff
 - Add notice for Sierra's "Trival Pin" requirements

Reset My Password

Please enter a new password.

- Use numbers and/or letters.
- Your new password must be 6 to 30 characters in length.

- Do not repeat a character three or more times in a row (for example: 1112, zeee, or x7gp3333 will not work).
- Do not repeat a set of characters two or more times in a row (for example: 1212, abab, abcabc, abcdabcd, queue, or banana will not work).

New Password:

Re-enter New Password:

[Reset My Password](#)

- Show specific Self-Registration errors to users when the error is reported from the API instead of generic error message. (eg "Trivial Pin" error) ([Minute 6:16](#))

Register for a Library Card

Please note: this is for new accounts only - if you already have an account please call or visit a library location for assistance. This temporary number allows you to place 5 physical items on hold and will allow you to access some online resources. You will need your permanent library card to gain access to some eresources including Kanopy, RBDigital, Lynda, and Universal Class. Please visit the library in the next 3 months with a valid picture ID and verification of your address in order to obtain your permanent library card.

PIN is not valid : PIN is trivial

- User Admin action for duplicate barcode user accounts in Pika (with different ILS id numbers (eg patron record number)) ([Minute 7:11](#))

User Administration

Reset Display Name

Barcode: [Reset User's display name](#)

Manage Duplicate-Barcode Accounts

Barcode: [Look up Accounts](#)

- Displays some basic information for each user to aid determining if there is duplication
- Display counts for any user-generated data associated with the user account. ie user lists, ratings, etc
- For Pika sites, using the Bib method for Format determination, format determination is improved for Physical Object records where the leader position 6 is a value of R ([Minute 9:41](#))
