mcMMO Information: [MCMMO wiki](#)

mcMMO is a plugin that adds skills and levels to things that you already use! Mining? That's now a skill with a level and bonuses attached to the level of your skill. You can get things like extra drops from going about mining as usual, even without an enchanted pickaxe.

It also adds a health bar to enemies you're fighting, so you know how close you're getting to killing something. It also adds skills and levels to weapons! For example, using an axe as a weapon has a chance to knock your enemy back!

Power level refers to all your skills' levels combined.

Lastly you can now form a party to share exp as you work together. The main command is /party Parties even have their own special chat, useful when you want to talk to a small group within the server. You must level up your party by gaining exp before being able to use party chat.

mcMMO commands:

<https://github.com/mcMMO-Dev/mcMMO/wiki/Player-commands>

/mctop - View the leaderboard for overall power level.

/mcrank - View your overall ranking on the server.

/mcstats - View all your mcMMO levels.

/mcsb keep - Keep the mcMMO scoreboard open for the currently displayed skill
