I act on the behalf of our VIP client (domain investor) and will help you to sell your domain. The buyer purchases several domains to generate traffic to his new web project. If you need faster response please contact me in Telegram. My user name in Telegram: DomainBrokerAsia (@DomainBrokerAsia).

Our commission is only 6 %. The commission is divided between you (3%) and the buyer (3%) and paid after you get the money.

The buyer offers \$10000.

The payment to you will be made via escrow service to protect both parties during the transaction. You will get 50% before the domain transfer and 50% after.

To proceed with the sale, the bank of the buyer requires a certificate of compliance with Korean law and trademarks because he will run his startup in South Korea. Please don't worry. If you don't have it you can order it online. I will help you with instructions and will not leave you along with this.

According to his country law the domain holder may lose domain if it has trademark conflicts or other legal. He is a professional investor and cannot afford to lose the money and domain and will send you the funds only after you send him the certificate from the independent agency that certifies for Korea. I hope you understand it.

If he buys without the certificate he may lose your domain + pay a big penalty. He must be sure your domain is in compliance with Korean law and has no TM issues.

The certification must include the following:

- Certification of compliance with Korean law and trademarks.
- The certificate must be up to date (issued during last 30 days).
- Official copy of the certificate in Korean.
- The certification agency must be authorized by the buyer and

his bank.

Please don't worry. It will be single certificate and it can be ordered online so it will take only 5 minutes of your time.

We asked him if GoDaddy, Sedo certificates will work for him. Now we are awaiting for his answer.

to me ▾

I talked to the buyer. GoDaddy and Sedo certificates don't meet the requirements (no copy in Korean and no Korean law compliance verification). His bank accept certificates from International subsidiary of a well known holding GMO Cloud - DigiRock Ltd. <https://digirock.org> They do the law compliance certificates and support English/Korean copies in PDF format. Go to this site and click Certification. Then submit your domain and wait for payment instructions.

If they approve your request they will send payment instructions via email. The certificates will be sent to your email in PDF. Send them to me as attachments and we will proceed with the sale.

Okay. When will I get paid?

Quicca Inc.

Dec 15, 2018, 4:55 AM (2 days ago)

After you send us the certificate.

Joseph Slabaugh

 Dec 15, 2018, 11:11 AM (2 days ago)

Here you go. now send the payment asap.

Certificate to confirm

That this non existant domain name

BTCI24.COM

Is legal in all jusristicctions of

South Korea

*The bullshit artist at
DigiRock Ltd.*
