[Course 3 | Environment Advanced Content | 3.1 – Chat Functionalities in the 6Connex Platform]

A client wishes to have a chat(s) be present that will allow for questions to be vetted and responded to by either 6Connex staff or an event administrator. In this situation, which type of chat should be deployed?

Select the best response from the list, then select Submit.

- A. Individual/ 1:1 Chat
- B. Public Chat
- C. Moderated Chat
- D. Video Chat

[SUBMIT]

That's right!

The moderated chat feature allows for questions to be vetted by administrators or a 6Connex staff member. We'll learn more about how to set it up later.

Not quite.

While there are several ways that chat functionalities can be used, this type of chat cannot perform the desired task.
