

How to contribute to the list?

This is far away from even being close to complete. There are hundreds of language servers on discord. I have only been able to link those that were more accessible, If you have a language server or you know of a language server that has not been listed here, you can;

- 1) Contact Navya0310#1255. If we do not share a server, you can send a friend request. I accept friend requests as long as it gets the work done. If we do share at least one server, you can directly message me regarding any changes to the list.
- 2) You can leave a comment here in the google doc too. However, contacting through discord is always preferable,
- 3) If you like the list, do let me know through Discord/Reddit/google Docs, wherever you have found this compilation of language servers.

MASS LANGUAGE SERVERS
