

Holochain Sprint-athon

29 Jan - 4 Feb 2018

A platform.earth
production

OVERVIEW:

The event is a week long Holochain sprint-athon. Like a hackathon, but with some definite coding projects (of course, you can roll your own if you're here!).

Alongside this, we are running a series of evening DEMOCRACY CAFE events (World Cafe / Unconference / Digital Soapbox). These will include production of podcasts of various kinds - from short opinion/breakout feedback items to long-format interviews / podchats. Let us know if you want to make something!

Sprint-athon Strands

1.0 Wiki on Holo - LiquidWiki

This is Wiki 2.0 we're talking about. Ward Cunningham, inventor of wiki, has been working on a full-on re-imagining of the wiki approach in a project called Federated wiki - where your pages are your own, with lightweight and flexible navigation and multi-format content, but with a

beautiful and liberating new dimension, whereby any user can fork, remix, adapt content from any public page.

You have to use it to appreciate the possibilities this opens up. At the Barcelona Holo Hack, a similar concept was developed, called Fractal Wiki.

This week, the main strand will be work to bring federated wiki and Fractal wiki ideas together onto holo, to make LiquidWiki.

SPRINT AIM: xxx

2.0 Mutual Credit Currencies

Holo grew out of the metacurrency project, and is philosophically the perfect platform for mutual credit currency, with its 'agent-centric', not data-centric' model.

It seems sure that many mutual credit and similar currency constructs will find a home on Holo.

This week, we'll be building one - a creative currency the Voz - to service a world-wide network of digital creatives and projects that open things up, that build capacity to collaborate, that make beautiful things happen.

Another strand will be the beginning of a project to develop a pattern language of mutual credit currency. Dil Green, who worked as an architect with Chris Alexander, the creator of Pattern Languages, will be convening this strand. This will overlap with the wiki strand - Liquidwiki will be the perfect place to build this out.

SPRINT AIM: xxx

Monday Jan 29 - WIKI DAY

Morning Session

Fed Wiki demo

Fractal Wiki features / aims

Lunch

Afternoon Session

Break

Evening Session

- Discussions
- Podcast recording

Tuesday Jan 30 - CURRENCY DAY

Morning Session

Lunch

Afternoon Session

Break

Evening Session

Democracy Cafe

- Discussions
- Podcast recording

Wednesday Wed 31 - Systems and Organisations Day - Trevor

Morning Session

XH - TREVOR HILDER

How Organisations *Really* Work

PT 1: Stafford Beer's Viable
Systems Model

Lunch

Afternoon Session

XH - TREVOR HILDER

How Organisations *Really* Work

PT 2: The Moral Modalities
Framework

Break

Evening Session

PROJECTS FOR THE POST-CAPITALIST
FUTURE

- Systems and organisations

Podcast recording

Thursday Feb 1 - ETHICS day

Morning Session

Lunch

Afternoon Session

PROGRESSIVE ETHICS PROJECT
Mapping the ethical framework

- Preparation of material for evening session

Break

Evening Session

PROGRESSIVE ETHICS PROJECT
Mapping the ethical framework

- Working session / discussion

Podcast recording

Friday Feb 2 INTEGRATIONS

Morning Session

coding

Lunch

Afternoon Session

coding

Break

Evening Session

- Discussions
- Podcast recording

Saturday Feb 3 - INTERVIEWS & PODCASTS

Morning Session

Tent

Lunch
