

# FIWARE Lab Nodes Management - 2015/12/15

# **Meeting Information**

Date/Time of the Meeting:	2015/12/15- 10:00 AM
nviting person:	Alfonso Pietropaolo
Purpose of the meeting:	Technical meeting for lab management issues
	Connect at:
Phone details (if PhC):	Please join my meeting.
	https://global.gotomeeting.com/join/954082694
	Use your microphone and speakers (VoIP) - a headset is
	recommended. Or, call in using your telephone.
	United States: +1 (619) 550-0006
	Australia: +61 2 8355 1024
	Austria: +43 (0) 7 2088 1403
	Belgium: +32 (0) 38 08 1856
	Canada: +1 (647) 497-9351
	Denmark: +45 (0) 69 91 88 64
	Finland: +358 (0) 942 41 5780
	France: +33 (0) 182 880 459
	Germany: +49 (0) 811 8899 6902
	Ireland: +353 (0) 14 845 978
	Italy: +39 0 553 98 95 67
	Netherlands: +31 (0) 208 080 381
	New Zealand: +64 (0) 9 909 7888
	Norway: +47 21 03 58 98
	Spain: +34 955 32 0845
	Sweden: +46 (0) 313 613 557
	Switzerland: +41 (0) 435 0167 09
	United Kingdom: +44 (0) 20 3535 0610
	Access Code: 954-082-694
	Audio PIN: Shown after joining the meeting
	Meeting ID: 954-082-694

# **Attendees**

Please write your name in the table below if you are attending the meeting.

Name (company)	Infrastructure
Alfonso Pietropaolo	LAB
Silvio Cretti	LAB
Cristian CMECIU (ILB)	Lannion
Wojbor Bogacki (PSNC)	Poznan
Marco Cipriani (TI)	NA
Spyros Argyropoulos	Crete
José Ignacio Carretero (Telefónica)	Spain
Giuseppe Cossu	NA
Ioannis Igoumenos	UTH
Vicent Borja (iMinds)	Gent
ilknur Chulani	ATOS
Cristian Cristelotti	Trento

# **Table of contents**

Minutes of meeting

- 1. Node status
- 2. FIWARE LAB KARMA
- 3. Report of FIWARE Lab Task Force
- 4. Discontinued Nodes Migration
  - 4.1 Status
  - 4.2 Process
- 5. Ticket status
- 6. Other questions
- 7. Old Activities

**OPEN STACK MIGRATION PLAN** 

**FREEING OF RESOURCES** 

**INTERNAL COMMUNITY ACCOUNTS** 

**Action Points** 

# **Minutes of meeting**

# 1. Node status

Following nodes have issues in infographics:

Node	Status	Updated on
Poznan	Node is fully operational. Everything is OK. All 24 tests pass successfully. Infographics also looks OK.	
Crete	Node is fully operational.  Need some more information to install Ceilometer.	15/12/2015
Gent	Node is fully operational. All Public IP already assigned even the once for new 2 network testing. We are searching a solution for the IPv4 exhaustion problem on our node. IPv6 would be an option.  About the new 2 network tests, we need to reset the shared networks settings since we are not able to assign a public IP since user are already using it. We plan to do that in the next weeks, also installing new requirements for the new monitoring system.  MDVPN link contract is over. Which are the alternatives? (Ans: VPN to Red.es) - Already in contact to switch to VPN solution.	15/12/2015

	AP - fix reporting in infographics on public IPs - <a href="http://infographic.lab.fiware.org">http://infographic.lab.fiware.org</a> - We need to restore monitoring node, planned with the upgrade and hardware migration to Kilo.	
Sophia-Antipolis	Node is fully operational. Everything is OK.  Improvement of Monitoring Nagios and quotas.  29/09/ no one call	
PiraeusU	Node is fully operational.  [All Jira FLUA requests are processed.]	14/12/2015
PiraeusN	Node is fully operational. Had an issue with keystone failures in Fi-Health which has been resolved.	15/12/2015
Budapest	Node is fully operational. Everything is green - all the 29/29 tests passed successfully. Preparation of Kilo environment is still ongoing. New FLUA tickets are handled in short notice. Installation of ceilometer has been done.	14/01/2016
	Cooling system was down on 1st January, and an unscheduled maintenance should have been done. Unfortunately, the backup cooling system did not start automatically. The problem was solved in short notice, but some services were temporarily unavailable.	
	Performance issue experienced two weeks ago has been solved by restarting neutron node.	
	Migration:  • Migration of MyFarm's VMs from Berlin2 is DONE.	
	Issue was reported on Blueprint instantiation:  • <a href="https://jira.fiware.org/browse/CLD-869">https://jira.fiware.org/browse/CLD-869</a> CLOSED	

	<ul> <li>https://jira.fiware.org/browse/CLD-930</li> <li>CLOSED - SOLVED</li> <li>Some components can be deployed via Blueprint and some of them is not. Strange error</li> <li>The ticket was CLOSED, and was reported that the issue was solved. However, we still get the same exception!!!</li> <li>It affects the closing of FLUA-1844: <a href="https://jira.fiware.org/browse/FLUA-1844">https://jira.fiware.org/browse/FLUA-184</a></li> </ul>	
Zurich	Node is fully operational. Looking into Kilo upgrade - having problems getting external access to new machines (complex story relating to move to new Data Centre). Still need to resolve public IP addr availability point in infographics - ODC is reporting correctly, but it seems there could be issue with NGSI adaptor - Fanis indicated that keepalive script could be causing problem but not clear why. Had some issues that the node was down for some time (amount of time unclear) - we observed this on eve of Sun 13/12/15 and it was remedied by morn of Mon 14/12/15.	17/12/2015
Karlskrona	Node is operational  Node is partially operational, Openstack has issues launching (move from Build to operational). Unclear why, investigating.	15/12/2015 24/11/2015
	Node is partially operational, Openstack has issues launching (move from Build to operational). Unclear why, investigating.	17/11/2015

	Node is fully operational.  Node is fully operational.  Node has problems creating VMs, we are investigating.	03/11/2015 30/10/2015 13/10/2015 06/10/2015
Volos	Node is fully operational.  Everything is ok. No issues to report	15/12/2015
Lannion	Node is fully operational. All support tickets were handled We reached 125 FLUA ticket approved.  => Migration to Kilo:  • Preparing upgrade to Kilo:  • We decided to upgrade to Kilo without any new hardware.  • We stopped the provisioning of VM over computes concerned to be used as controllers/computes for the new Kilo platform.  • We started emptying the concerned nodes, and to move the active VM to the active computes of our platform (the process is slow: mail to the client, confirmation from the client , snapshot and migrate).  => Sanity Check: OK  => Help Ticket:  • All help Jira ticket resolved  => Ceilometer:  • NODEM-310: Ceilometer installed on the prod node but not configured: we need instruction for a node in HA, we need the instruction for the configuration with Keystone.  => Blueprint:  • LAB-214/LAB-283: Floating IPs not assigned to all	15/12/2015

	deployed tiers (on going). Bug related to nova deployed by fuel6.0. It should have been solved on sprint 4.4.3 released in sept the 30th  => Object Storage:  • FIM-8: Problem Handling Quotas with swift: in progress  => Block Storage:  • CP-49/CLD-820: Cannot backup a volume from the CP: Scheduled 5.2 Release: 31/Mar/16  => Images:  • (CLD-593/ HELP-3977): CentOS-7 image can't retrieve metadata. issue related with cloud init which incompatible with Neutron GRE on a HA node.  • (LAB-306): GIS-3.3.3: at reboot, the instance stuck at grub page. Supposed to be solved on sprint 4.4.3 available on 30 sept with the new version GIS 4.4.3, but the image is not available yet in the catalogue  • GIS 3.3.3: available on ly in the catalogue	
Trento	Node fully operational. Everything green on Infographics. All tickets have been processed.  Node fully operational. Everything green on Infographics. All tickets have been processed.	15/12/2015
	Node fully operational. Everything green on Infographics. All tickets have been processed.	23/11/2015
	Node fully operational. Everything green on Infographics. All tickets have been processed.	17/11/2015
	Node fully operational. Everything green on Infographics. All tickets have been processed.	10/11/2015
	Node fully operational. Everything green on	03/11/2015
	Infographics. All tickets have been processed. Ongoing preparation for Kilo migration.	
Spain	Migrated to Kilo.	15/12/2015

	Updated Swift to kilo, making tests.  Planned migration of new version of Keyrock by 10th December.  256 new cores added.	
Prague	Node is fully operational.  Everything is green, karma monitoring occasionally suffers from unrelated bugs. Kilo migration ongoing (waiting for the compatibility tests). Still performing CEPH performance tests.	12/10/2015 - all green
Mexico	Node is fully operational. Planned next months the installation of Ceilometer.  Planned installation of Commercial Node by the beginning of next year.  Possibility to increase computer capacity of adding new FIWARE Lab node.  Waiting the new version of Monitoring Architecture to use it.	01/12/2015
Sao Paulo	Node is fully operational thanks to Giuseppe (CNET).  Working to recover the Monitoring tools.	01/12/2015
ATOS-TEST	Installed Murano, having some issues in the verification stage (while trying to do the tests in the wiki page)	15/12/2015

# 2. FIWARE LAB KARMA (updated 2015/12/14)

 $\frac{https://docs.google.com/spreadsheets/d/1mHnw-2ci0UKNxsR6GxSLG0Sp38jL73iQWV4Jcz9f\_J0/edit}{?pli=1\#gid=1035878825}$ 

AP - Federico / Fernando / Silvio - Revise Karma calculation

- Open tickets part of Karma
- More relevant weight health checks

#### 3. Report of FIWARE Lab Task Force

no news

### 4. Discontinued Nodes Migration

#### 4.1 Status

No nodes affected in the call

#### 4.2 Process

Step 1. Inform user lab users (two reminders sent) - Completed

User replies are here:

https://docs.google.com/spreadsheets/d/1xPYsE0ykpFUhUkaZfY0cLFRDpXwVR5hxOI8g5b0b2 Al/edit#gid=1976482541

Step 2. Interested nodes (Berlin / Stockholm / Waterford) should get in contact with users that replied and

Need support: coordinate the migration with the user and the new node. Add the user to the new node in Account system and inform him that he has been granted access to the new node. Ask the node admins to apply quotas as the ones he had in the current node.

No need support: add the user to the new node in Account system and inform him that he has been granted access to the new node. Ask the node admins to apply quotas as the ones he had in the current node.

Step 3. Notify users that didn't reply, that if they don't take actions before 30/09/2015 their virtual machine will be removed. (Providing instructions on how to download images if needed would be good).

Thomas: What should happen with users that didn't answered the survey?

Send notification to users by mail, if they don't reply until end of September images can be

removed.

## 5. Ticket status (updated 2015/12/14)

NODE	TICKET	COMMENTS
Prague	HELP-5382	21 days

## 6. Other questions

As mentioned in the call, Giuseppe is available to support current and new nodes in the OpenStack related issues.

What is going to happen with the cleanup script??? Now that our node is overbooked we could really use a cleanup of trial users. (Fanis - Neuropublic/PiraeusN)

#### **OPEN STACK MIGRATION PLAN**

New Migration Plan in order to upgrade nodes to Kilo version.

https://docs.google.com/document/d/1zmFAB4cFW8uYZ00wwyexH5tW0idw-y5c2lDjJilh3W8/edit?usp=sharing

ILB: Is there any Region/Node who were able to work on migrating user's data from swift from 1 node to another? (Riwal: It seems, people cannot hear me on the call)

#### **NEW INFOGRAPHIC:**

http://infographic.lab.fiware.org/

#### 7. Old Activities

https://lists.fiware.org/listinfo/fiware-cloud

(please check and update your current version)

old plan:

https://docs.google.com/document/d/1jqypqp5Wf6dJgQufqVJicXDcJpoL1ajTPjjYtnQn-sw/edit

#### FREEING OF RESOURCES

https://docs.google.com/a/create-net.org/spreadsheets/d/1xMmcTPP5FmlqlkBjm4igg58m7GaZv N2spXZflhF7Q4U/edit#gid=0

#### INTERNAL COMMUNITY ACCOUNTS

https://docs.google.com/document/d/1g4y1sSvNLzxlSxDneY5X5noT9dMZI1GC\_QKVwb3Dr6I/edit?usp=sharing

# **Action Points**

Number	Description	Owner	Deadline	Status
#1	Every meeting create a status of open tickets for users.  - General - Node per node	Alfonso	13/10/2015	Done
#2	Revise karma to include open tickets	Federico + Fernando + Silvio	13/10/2015	Ongoing
#3	Contact discontinued nodes about tenant migration	Federico	06/10/2015	Done
#4	Create a Google drive with all	Alfonso	13/10/2015	Done

minutes and share it
