

Killer

The Juggalo:

Weapon:

Like The Unknown The Juggalo can use other weapons as cosmetics

This was hard because ICP made it clear they LOVE axes with songs like [My Axe](#), [Night Of The Axe](#), and in [I Want My Shit](#) they say "I want a rusty axe" and many many more examples

A Bat is very Clowncore but it wouldn't be original because of Trickster

A Shovel would definitely be creative but definitely not iconic for ICP since they rarely mention it

Even a knife would be good for them since it's hinted in [To Catch A Predator](#) that that's what they use to kill predators but I feel like knives will be a higher rarity sense they have to make a new animation while Axe, Bat, and Shovel you can get away with the same animation

Power: Jokers Cards:

Based on ICP album collections "Joker Cards" that are still being made today so I'll focus on the 3 most popular Joker Cards with a 25 second cool down and cycle through them in order of

[Hell's Pit](#) - if hit puts the survivor into the -15% hundred status effect for 15 seconds

[Bang! Pow! Boom!](#) - if hit the survivor will be put into a Deep Wound status effect no matter what

[The Amazing Jeckle Brothers](#) - will be thrown in a V shape throwing each card at the same time if a survivor gets hit by a Jeckle Card they will lose a health state

Add-ons:

Not every add on will be added but my personal favorite:

(Pink) Iridescent [Toy Box](#): this add on will allow you to hold the ability button to swap cards kinda like The Clown

(Pink) [Bring It On](#): The Jeckle Brothers Card will change into a straight line hit that shoot rapidly right after the other

(Purple) [Burning Up](#): When a survivor gets hit with Hell's pit they will lose a health state

(Green) [Hokus Pokus](#): after hitting a survivor with a Joker Card it will reveal the aura of any survivor within the killers terror radius

Perks:

[Down With The Clown](#): For every time you hit a survivor other then your Obsession the aura of your other survivors, and Hatch will be revealed to you for 15 seconds

Hex: [Blaaam!!!](#): After kicking a Gen survivors within 24 meters from you will become oblivious for 20 seconds and exposed for 10 seconds for every Gen pop another hex will spawn

[Heart And Soul](#): When you hit your Obsession you gain a token for each token you gain 5% haste while carrying survivors you lose all taken if your obsession is dead

Mori:

The default Mori would be that The Juggalo will pull out a fake gun that shoots out a flag that says "BANG! POW! BOOM!" Frustrated they throw the gun at the survivor then pull out their weapon and bash them in the head over and over until death
