Number Grid and Beat Support

This page explains the main controls and how to get help with the Number Grid & Beat iPhone app.

Number grid practice

In Numbers, choose a grid size, start a round, and tap the numbers in order. The app saves your times and round history on your device.

Beat practice

In Beat, set a speed from 30 to 300 BPM, then tap Start beat. You can stop the beat at any time.

Coffee tips

After a new record, you can choose 1 to 10 coffees and make an optional in-app purchase through Apple. The app shows the total before purchase. A tip does not unlock app features. For App Store billing or refund requests, visit reportaproblem.apple.com.

Contact

For app questions or problems, email learnfreeapp@gmail.com. Please include your device model, iOS version, and a short description of the issue. Do not send payment details.
