

Hey Mike,

You know the old times as a kid where someone put his foot in front of you while you ran and you fell on your face? And maybe you even have broken your nose?

What would our reaction normally be, Mike? Would we politely say „oh you are all good, nothing happened“?

Or would we actually want to smack the sh.. out of them?

So, why am I telling you this, Mike?

The reason is that I fell on my face because of YOU!!

You read it right!

When I was scrolling through YouTube, your video about how to strengthen your neck put its foot in front of me. I stumbled. Broke my nose!!

But instead of acting foolish like in the old days, I decided to check your instagram page out to see who you are.

And when I saw that you try to generate traffic from your IG to your website, some IG captions ideas popped up in my mind on how you could take more people from your audience to your website; which you can turn into loyal customers.

You find them down below.

Kind regards  
Alim

Ps: How many Leads do you think they will generate? Let me know what you think:)
