

Compared to other major cities in Texas, Irving is sometimes forgotten. It doesn't have any major sports teams or the Houston Space Center. However, Irving is home to the famous Irving Arts Center and is a bustling suburb wedged in between Dallas, Arlington, and Fort Worth. Thanks to its central location in Texas, Irving is a major player in the electricity market.

If you live in or around Irving and are in search of a new electricity provider, you've come to the right place. This article will discuss everything you need to know about electricity in Irving, Texas, including how to choose the right provider and how the power market works. Let's dive in!

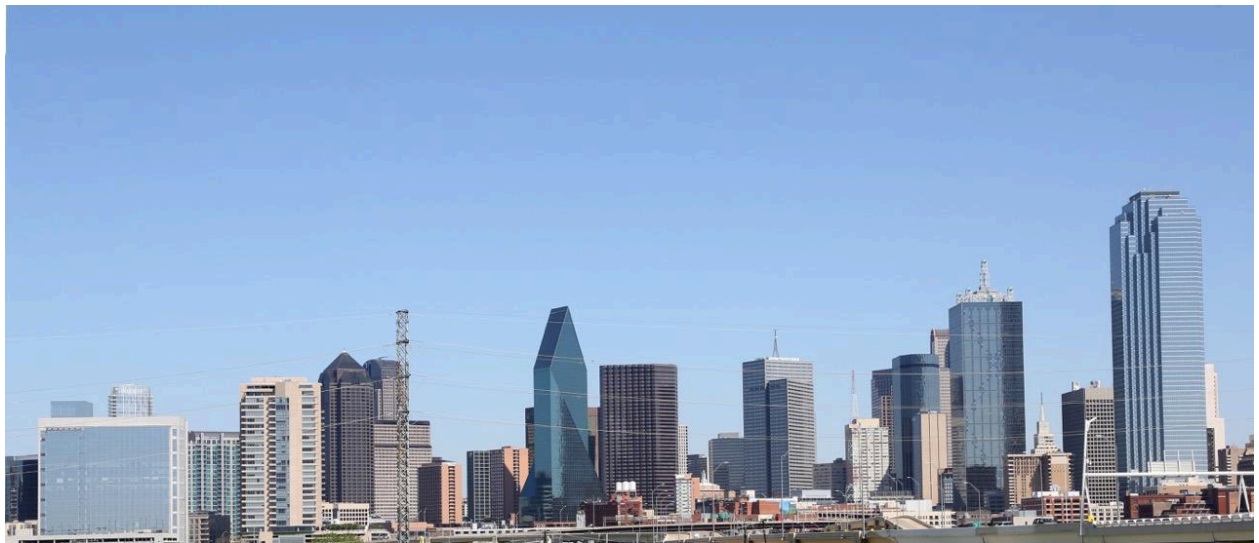

How Does Electricity Work in Irving?

What are the Electricity Rates in Irving?

What Types of Electricity Plans are Available in Irving?

Is GoodCharlie Energy the Best Electricity Company for Me in Irving?

How Does Electricity Work in Irving?

As with over 80% of Texas, Irving is a city that has deregulated electricity. Deregulated electricity, aka deregulation, means that the electricity market in Irving isn't regulated by government officials. Instead, anyone with the means, desire, and know-how can start their own electricity company and structure their plans and rates however they please.

As a result, the electricity market in Irving is highly competitive and ever-changing. The best electricity company today might be the most expensive company tomorrow, and so on. Because of how volatile and malleable the electricity market is in Irving, it's important to choose an electricity plan from a stable, reliable company. [Contact us](#) at GoodCharlie Energy if you like the sound of that!

What are the Electricity Rates in Irving?

If you live in Irving, you're in luck when it comes to affordable electricity. The current rates in Irving are anywhere between 11 and 12 cents/kWh, which is nearly two cents lower than the Texas average. It's also 3 to 4 cents cheaper than the national average, making Irving one of the most affordable cities in Texas in terms of electricity prices.

However, if you lock yourself into an electricity plan with the wrong company, you could easily end up paying 13 to 20 cents/kWh. Therefore, it's vital to understand your electricity needs and usage and choose a plan that fits those requirements.

Is GoodCharlie Energy Available in Irving?

Depending on where you're located in Irving, TX, GoodCharlie Energy is available to you. And, if it is available to you, GoodCharlie's rates are between 11 and 11.3 cents/kWh, right on pace with the Irving average.

However, because of how spread out Irving is, GoodCharlie may not be available in all areas. To find out for sure, you should go to our website and [enter your zip code](#) into our database. If GoodCharlie is available in your area, you'll instantly see a list of plans to choose from.

What Types of Electricity Plans are Available in Irving?

Depending on where you live in Irving, you'll have the option of choosing between hundreds of different electricity plans. However, you'll also have the option of choosing between several different TYPES of plans. The type of plan you choose could have an impact on your electricity rate.

Prepaid Electricity Plans

Prepaid electricity plans are where you pay for electricity before you use it. While these types of plans are straightforward and easy to understand, they also have higher rates than variable and fixed-rate plans. As such, you could pay anywhere from 15 to 20 cents/kWh when you sign up for a prepaid electricity plan.

Variable-Rate Plans

The second type of electricity plan option in Irving is variable-rate plans. With a variable-rate plan, your electricity rate changes from month-to-month depending on what the economy and market do. While there's a chance that your rates could go down, there's a better chance that your rate will increase. As such, you'll either have to find a new plan at the end of each month or eat the extra cost.

Fixed-Rate Plans

The third and most popular option when it comes to electricity plans is fixed-rate electricity plans. Fixed-rate plans are where you lock yourself into a fixed-term contract for a set amount of months or years, and your rate doesn't change throughout the duration of your contract.

Fixed-rate electricity plans are exclusively what GoodCharlie Energy offers our customers, and they're the best overall type of plan in Texas. At GoodCharlie, we offer fixed-rate plans with terms of one, two, or three-year options.

Is GoodCharlie Energy the Best Electricity Company for Me in Irving?

If you're looking for a new electricity company in Irving, look no further than GoodCharlie Energy. Here are some of the advantages of enrolling in a plan with us.

- We have competitive rates and comprehensive plans with no hidden fees.

- Each of our plans is available with electricity from a renewable resource such as wind or solar.
