I feel like this one's staring at me. O.O [#evolvingprocesses](#) [#evolproc](#) [#mjbedford](#) reblogged by this process:

<https://docs.google.com/document/d/14qmClam8mHfml7UQAETFkXlmp2NPyxiGnpMxyftB9vw/edit?usp=sharing>

[Mj Bedford originally shared:](#)

Make Art! not War.
artwork I created
Coexist with the planet.

[mj] SLEEP (link to this process from some quiet pool where it can rest for a while until the next time it's needed)

sent to “swirl to sleep”

https://docs.google.com/document/d/1PHcAzxDQrBFtCbKKvtqsexLMsUxUbS2NWwc6gllnRs/e_dit

[mj] SUGGESTIONS FOR THE MUTATORS (make some suggestions of ways this process could perhaps be improved, just to give the mutators some ideas)

wake up, memorable urls, maybe slogans, multiple rebloggings probly

[mj] CONSIDER MUTATIONS FROM GOOD MUTATIONS LIST (consider whether any of the mutations on the good mutations list at <http://evolvingprocesses.wikidot.com/good-mutations> might be useful for this process)

OK fine I'll give it Trim. I modified it for this family so I should probably flow that back over there again too I guess. There phew I copied it back over. IDK, isn't Trim supposed to go with an Archive step? Well w/e, these always save a whole scroll of history. :/

[mj] MUTATE (please make some improvements or changes in the clean copy of this checklist below -- write somewhat carefully, as your changes might be copied many times into the future)

I brought in a link CHIID from parent from Machine Velcro Threat

i guess while i'm there it has this plain repeating slogan step, i'll toss that in for ya

i just typed in Wake Up again. have i not typed that into this whole family? i should have some macros or something to put in the same steps i keep doing, i'm being inefficient sorry. :(

And I took the Memorable URL step from Communistic Anchorwoman but I made it into a more reasonable childcare step. Oh and this strain already has Spruce Up. Fuck it I'm done then. :) :)

[] CONSIDER ADDING MUTATIONS TO GOOD MUTATIONS LIST (consider whether any of the mutations that were just made to this process might be useful more broadly, and if so add them to this <http://evolvingprocesses.wikidot.com/good-mutations> list of good mutations)

[] SPRUCE UP (go over the checklist below and just tweak a few things here and there to keep everything looking pretty and making sense)

[] COPY (make a new editable document somewhere (for instance one of these <http://evolvingprocesses.wikidot.com/working-etherpad-servers> open etherpad servers) and copy the clean checklist below into that new document (twice!))

[] LOOP (copy the clean checklist below again below itself, so this process can continue rolling along this infinite mutating loop)

~ - - ~ ~ Mj Bedford Reblogging Process ~ - - ~ ~

- ~ - rolling infinite checklist - ~ -

[] SLOGAN (invent an inspiring slogan for this process)

[] RECENTLY ACTIVE PROCESSES (link to this process from the generic list of recently active processes at <http://piratenpad.de/p/RecentlyActiveProcesses> along with a brief description of this process's current situation)

[] REBLOG MJ BEDFORD (post about this process on Google+ along with a reblogged picture by Mj Bedford <https://plus.google.com/100574403144892910716/posts> then link to that reblog and copy its text here)

[] TRIM (if there are used, completed copies of this checklist above, trim out all or most of those versions (perhaps leaving just some brief quotes as mementos of what's happened in this strain's past) to make room for new iterations)

[] SLEEP (link to this process from some quiet pool where it can rest for a while until the next time it's needed)

[] WAKE UP (write a brief note here as to why you're waking up this particular process today)

[] SUGGESTIONS FOR THE MUTATORS (make some suggestions of ways this process could perhaps be improved, just to give the mutators some ideas)

[] CONSIDER MUTATIONS FROM GOOD MUTATIONS LIST (consider whether any of the mutations on the good mutations list at <http://evolvingprocesses.wikidot.com/good-mutations> might be useful for this process)

[] MUTATE (please make some improvements or changes in the clean copy of this checklist below -- write somewhat carefully, as your changes might be copied many times into the future)

[] CONSIDER ADDING MUTATIONS TO GOOD MUTATIONS LIST (consider whether any of the mutations that were just made to this process might be useful more broadly, and if so add them to this <http://evolvingprocesses.wikidot.com/good-mutations> list of good mutations)

[] SPRUCE UP (go over the checklist below and just tweak a few things here and there to keep everything looking pretty and making sense)

[] COPY (make a new editable document somewhere (for instance one of these <http://evolvingprocesses.wikidot.com/working-etherpad-servers> open etherpad servers) and copy the clean checklist below into that new document (twice!))

[] LINK CHILD TO PARENT (insert a note at the very top of this new child that says "parent" and then links back to here)

[] MEMORABLE URL FOR CHILD (use the random word generator at <http://coyotecult.com/tools/randomwordgenerator.php> to choose some random words, then use them on <http://tinyurl.com> to make a more memorable link to this child's document)

[] LOOP (copy the clean checklist below again below itself, so this process can continue rolling along this infinite mutating loop)
