

The Title of Article Should Be No More Than 18 Words (Cambria, Align Left, Font 14, Bold)

First Author¹, Second Author², Third Author³ (Cambria, 11pt)

Author's Department, Institution, Country (Cambria, 11pt, italic, align left)

²Co-Author's Department, Institution, Country (Cambria, 11pt, italic, align left)

Corresponding author: xxxxx@gmail.ac.id

Abstract

The abstract is described briefly, clearly, and concisely, covering key points such as the research objectives, methods, as well as a summary of the research results. The abstract must not contain tables, figures, or quotations. The abstract is written in a single paragraph in English with a maximum of 250 words (Cambria, 10pt, single-spaced).

Introduction (section)

This section contains the research problem and background, the research gap, objective, the organization of the study, and contribution (the research benefit from theoretical and practical), research result and implication (Practical advice based on research result). The research result and implication in the introduction section are an only suggestion (not mandatory).

The numbering of section and sub-section is following on this template. All margins should be 3 cm with A4 for size of paper with all 1.15 spacing and always add space after paragraph. Sizes and styles of page setup shown in this below. The example of table and figure also shown in this below.

Table 2. Validity and Reliability Results

Variables	Item	Loading Factor	Scale Reliability Coefficient
Work-life Balance (WLB)	3	0.855 - 0.922	0.877
Islamic Work Ethics (IWE)	9	0.630 - 0.852	0.906
Grattitude (Gr)	10	0.666 - 0.857	0.920
Religiosity (Rg)	10	0.719 - 0.886	0.943

Source: data processed (2024)

Figure 1. Research Framework

The authors must show a clear table and images. If you want to display a chart, then all information such as Title chart, Axis title, Legend, Data labels, Data table, Plot area, etc. must be clear and understandable. Each table, image, and graph must be given an appropriate explanation and numbering in accordance with the template. The section consists of background of the study. The content of manuscript must be contained Introduction, Literature Review, Methodology, Results & Analysis, and Conclusion & Recommendation. The section consists of objective of the study.

Literature Review and Hypothesis Development

This section consists of theory that support the research based on original papers or authoritative international text books. This sub-chapter describes relevant, comprehensive and updated past studies (Scopus/WoS), related to the topic, as well as summarizes the past studies of what seems to be consensus, settled, and what remains a puzzle that support the research. This section consists of illustration and description of the conceptual framework to answer the research questions.

Method

Sample and Population

Methodology consists of data, model development and method used. The paper can be either quantitative or qualitative. However, if the paper is quantitative, equations may appear in line with the text, if they are simple, short, and not of major importance; e.g., $a = b/c$. Important equations appear on their own line. Principal equations are numbered, with the equation number placed within

parentheses and right justified. Authors are strongly encouraged to use MS Word Equation Editor or Math Type to create both in-text and display equations. Equations are considered to be part of a sentence and should be punctuated accordingly.

To set the style, type Equation in the style box. But this style only set the tab stop position. To put the equation on the right place just press tab button one time. And to type the equation number, press tab button once again from the right side of the equation.

Measurement

Methodology consists of data, model development and method used. The paper can be either quantitative or qualitative. However, if the paper is quantitative, equations may appear in line with the text, if they are simple, short, and not of major importance; e.g., $a = b/c$. Important equations appear on their own line. Principal equations are numbered, with the equation number placed within parentheses and right justified.

Data Analysis

This section consists of explanation of the method(s) used, and why it is (they are) used. Why not other methods. Refer to the original references of the inventor of the method first, then refer to others, such as journals and/or international textbook.

Results and Discussion

This section consists of presentation of all the results in tables, graphs, etc. and the description of those numbers and figures.

This section consists of critical discussion on the findings, explanation of the novelty of the results of the study, justifications of the results, and discussions how do the results differ or equate to other related studies.

Conclusion and Recommendation

This section consists of explanation of the findings of the research questions. And, if any, the explanations of other findings. This section consists of recommendations for future research based on the findings of this study. This section consists of recommendations for practitioner, regulator and academician, based on the findings of this study.

References

The reference in this journal uses APA Citation Style. The degree of sophistication of materials is referred to in the span of 10 years. The references are expected to be 80% of the primary sources originated from the national and international journals. Writing citations referenced in **the script should use reference applications (reference manager), such as Mendeley, Endnote, or Zotero.**
