Skills

HTML5, CSS3, Tailwind CSS, JavaScript, TypeScript, ReactJs, React Native, Angular, NextJS, Java, NestJs, Spring Boot, SQL, NoSQL, RxJS, Jenkins, Jira & Git

Experience

Capgemini / Associate Consultant

June 2021 - Sep. 2024, Chicago, IL

- Enhanced Angular v.11 application by implementing UI improvements, feature updates, and debugging issues.
- Developed and executed unit tests using Jasmine and Jest, and conducted various testing types—including behavior, smoke, integration, performance, automation, and acceptance—based on project needs.
- Supported API migration to OpenShift Container Platform (OCP) and updated Spring Boot applications to JDK 17, resolved code smells, fixed deprecated dependencies and functionalities.
- Gained experience with Jenkins and Bitbucket pipelines, including deployment processes and updating ConfigMaps across environments.
- Processed and transformed payload data from 18 microservices for seamless integration with a front-end Angular application.
- Collaborated on migrating a legacy monolithic application to a cloud-based microservices architecture, leveraging NestJS.
- Monitored and validated microservice integrations to ensure consistent results with the legacy monolithic application being replaced.
- Used Splunk for data gathering, mocking, and creating dashboards to meet business requirements and monitor post-deployment errors.
- Identified and reported API data inconsistencies to the microservice team and product owner, leading to the resolution of critical bugs.
- Worked closely with remote and cross-functional teams and provided mentorship to junior developers.

Starbucks Coffee Corporation / Shift Supervisor

May 2012 - June 2021, Schererville, IN

- Managed daily operations, led shifts, and provided mentorship in a high-volume retail environment.
- Strengthened leadership and communication skills while maintaining high team morale and customer satisfaction.

Projects

Tech Bit-by-Bit / Founder & Creator

Jan. 2025 - Present

- Designing and enhancing a personal tech blog using Next.js, Tailwind CSS, Clerk for authentication, Umami for analytics, Cusdis for comments, and Google AdSense for monetization.
- Creating beginner-friendly tech content with minimal jargon, focusing on inclusion, humor, and accessible analogies.
- Planning content strategy, editing videos, and fostering a welcoming space for those curious or new to tech.

Split the Jar / Solo Developer & Designer

Ongoing

- Developing a business productivity tool with Next.js and Material.
- Focusing on scalability, accessibility, responsiveness, and real-world usability in dynamic work environments..

The Quiet Grind Philosophy / Solo Developer & Designer

Ongoing

- Building a calming Pomodoro-style productivity app with focus on accessibility using Next.js.

Portfolio Site / Solo Developer & Designer

- Fully responsive portfolio site built using React and Tailwind CSS, showcasing development work and personal projects.

Find Gatsby / Solo Developer & Designer

- A fun, interactive app inspired by my dog, featuring a card-based UI built with React and Styled Components.

Education
