(10pts; Italic)

## **ABSTRACT**

The abstract should be clear, concise and descriptive. It is written in 12 pts Times New Roman (single spacing) and preferably not more than 250 words. Abstract consists of:

**Background:** brief background of the topic and significance of the study.

**Purpose:** the major aim of the study.

**Methods:** brief summary of study setting and participants; the study design; major methods used to collect and analyze data, including the proper name of instruments used.

**Results:** the major findings.

**Conclusion:** conclusions and implications for nursing practice.

### **Keywords:**

Maximum of 5 keywords separated by coma (,), crucial to the appropriate indexing of the papers, are to be given.

(Manuscript is written in 12 pts Times New Roman and single spacing.)

## **BACKGROUND**

Background provides the state of the art of the study and consists of an adequate background, the previous researches and significance of the study to show the scientific merit or novelties of the paper. Avoid the use of literature review or a summary of the results.

## **OBJECTIVE**

Objective states the major aim of the study.

## **METHODS**

Method consists of:

Design and samples (including place and time of research)

Research instrument and data collection

Data analysis

Ethical consideration.

## **RESULTS**

Results describe the major findings of the study. It should be clear, concise and can be reported on texts or graphics. Please provide some introduction for the information presented on tables or images.

## **DISCUSSION**

The discussion should explore the significance of the results of the study. The following components should be covered in discussion: How do your results relate to the original question or objectives outlined in the background section (what)? Do you provide interpretation scientifically for each of your results or findings presented (why)? Are your results consistent with what other investigators have reported (what else)? Or are there any differences?

## **CONCLUSION**

Conclusion should answer the objectives of the study. Provide a clear scientific justification for your study, and indicate possible recommendation for nursing practice and future practice.

## **ACKNOWLEDGMENTS (if any):**

Briefly acknowledge research funders, and any research participants in this section.

## **CONFLICTS OF INTEREST**

Explain whether there is a conflict of interest in this research

## **REFERENCES**

Write reference in APA format. The Reference consists of all references used to write the articles. **Ensure that citations used are as contemporary as possible**, including
