

ADDENDUM to *Philosophy: The Big Questions*

- p 307, after the last paragraph, ending "...but can never be certain," append the following:
Kant, the anti-empiricist, argued the contrary position that *a priori* knowledge about the world, called synthetic *a priori* knowledge by him, is possible. Put another way, unlike the empiricists, he thought that knowledge of the world with the certainty of deduction (*a priori* knowledge) is possible.
- A NOTE TO GRADE 12 TEACHERS: This book was originally prepared as a text for the Ontario Ministry of Education grade 11 course, *Philosophy: The Big Questions* (HZB3O). It is sufficiently comprehensive and detailed to be of use as a supplementary resource in the grade 12 course as well. This book is now out of print. The authors are pleased to offer it as a free web publication.
