SUMMARY

Entry-level web developer with 2 years of experience in Javascript, HTML5, and React. Proven ability to create reusable components for an enterprise-level web application. Passionate about technology and building scalable web solutions.

EXPERIENCE

Internship

Futurionic   **Gurugram, Haryana 122004**

• During my internship at this company, I contributed to a project. And I have learnt a lot besides contributing to that company remotely.

• I designed frontend components, structured pages, and customisedly used templates to align with project requirements.

Individual and Freelance projects

Work from Home   **Jan 2023 - Present, Remote**

• Since the beginning of 2023, I have completed over 20 diverse projects. These projects primarily utilised React.js for frontend development, with Next.js for backend support and Express.js alongside Next.js for server-side actions.

• I employed Firebase, MySQL, and MongoDB for database management. Additionally, I utilized Tailwind CSS, Sass, and raw CSS for styling purposes.

• I have integrated five distinct authentication systems and employed four storage systems according to each project's requirements.

• Additionally, I utilized Prisma as the database ORM system.

PROJECTS

www.owldaccabd.com

• This is a versatile application service as both a web platform and a Progressive Web App (PWA) app accessible on mobile and desktop devices.

• It consisted of two distinct interfaces: the adminEnd and the userEnd. Users can explore a comprehensive catalogue of products across various restaurants, seamlessly adding items from multiple restaurants into a cart.

• Upon checkout, they have the option to apply available coupons to their orders, which enhances their shopping experience.

• Simultaneously, admin has some exclusive privileges enabling them to create, modify and diminish the restaurants, food items, delivery locations, coupons, and billboards. And it has two admin systems, one super admin; who can manage all the admins.

www.studentaffairsbd.com

• This is a portfolio website, It beautifully exhibits the agency's profile, missions and visions upon the visual evidence of their success stories.

• With this website; visitors can learn about the services and working areas. And it has a pipeline (Email system) to connect with the agency without leaving it.

www.remotecoded.com

• A platform that connects developers with their clients. Customers can post their project's idea or a company can post their openings to grab the coders/developers.

• It works like Fiverr, It has many sorting systems to make perfect deals without wasting time. And applicants can track their interviews.

• In addition to its fundamental functionalities, the platform provides a seamless refund process, ensuring users can easily request refunds if any unforeseen circumstances or mishaps.

www.swiftsaasai.app

• A non-profit AI platform for the learners especially, It has ability to generate Idea, Code, image, music, and video.

EDUCATION

• Though I am a self-taught student, I have considered many courses to accomplish on time; the major reason is the learning discipline.

• The main platform is YouTube. But I decided to undergo some courses from LWS, PH, and Udemmy etc.

SKILLS

Software : Javascript HTML, CSS, and SQL. Frameworks: Next.js || Portfolio : www.nishadchowdhury.online
