Instructions for accessing the Failure-Free Reading Program:

Step 1. Go to the following website: https://www.failurefreeonline.com/login/login.php:

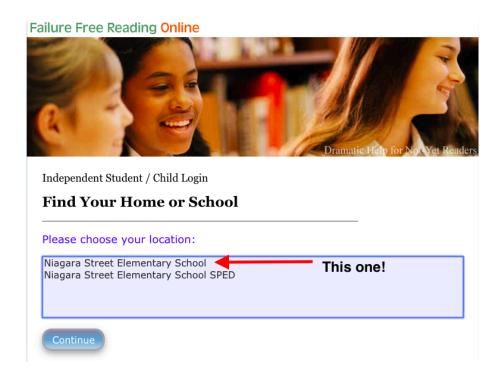

Step 2. Type in the school's zip code:

Step 3. Choose the correct option. For my classes, it's Niagara Street School.

Failure Free Reading Online

Independent Student / Child Login

Find Your Home or School

Please choose your location:

Niagara Street Elementary School ← **This one!**
Niagara Street Elementary School SPED

Continue

Step 4. Enter your access code (user name), followed by your password. They are the same.

Independent Child Login

Enter Your Access Code

Enter your access code

Your access code/user name is your first name, followed by 2019 without any spaces.

Continue

What is an Access Code?

For example, if your first name was Michael, your access code and password would be Michael2019.

Your access code allows you to start your lessons without your Parent present. It also keeps others from accessing your information.

From here, you should see your homescreen and your current lesson.

Here's how Failure Free usually works (Source can be found [here](#)):

STEP 1: Scripted Teacher-Led Oral Language Development Lesson

Direct Instruction:
I meet with each student/group to preview vocabulary, models reading, teaches comprehension using factual, inferential and leading questions.

- **This can be completed in step 2 as there is a pre-teaching component included.**

STEP 2: Talking Software

Reinforce:
Students move to the computer for self-paced instruction that provides the structure, privacy and positive and immediate feedback necessary for independent engagement and independence:

(The following are all the components of **EACH** lesson):

• Pre/post tests for each story
• Pre-teaching lesson for each lesson (similar to what is provided in step 1)
• Talking book instruction each lesson
• Word Recognition activity each lesson
• Reinforcement Activities each lesson include spelling practice
• Reading Comprehension Quiz

STEP 3: Print Independent Activities

Students complete two short pages of reinforcement activities related to the lesson. This is typically completed through their workbooks that they

use in school. I can provide you with the pages digitally, but you are also able to discuss them instead.
