

SL: Fast Pace

Hey [name],

Noticed that you have tried posting Instagram reels, but they don't seem to get the attention they deserve.

Was wondering if you would be open to trying more "energetic" and fast-paced types of reels for your Instagram, that way you keep the viewers engaged.

Since Instagram is trying to push reels to people's feeds as much as possible right now, you cannot afford to miss out on the opportunity to get instant brand exposure.

I could edit a reel to show you an example of the difference in your engagement, are you interested?
