Recruit Release Notes Changes Launching 2020-07-09

Disability Self-Identification Form

Hold on deployment per demo discussion

We have **updated the header, questions, options, and footer in the Voluntary Self-Identification of Disability** section on the demographic survey to reflect the recent Office of Federal Contract Compliance Programs (OFCCP) changes for the Disability Self-Identification form.

Speedup of review process

The **activity log on the application hoverboard** will display the log entries within a new pop-up view. In addition, we **added the Search field** so a user can search for a particular entry.

Bugs & stuff

- We fixed an issue with the Personal Note on the new application popup review window so that it displays properly after being added/edited.
- We also resolved an issue where adding/editing Public comments on the new application popup view was not updating the corresponding column in the background on the Applicant grid.
- There was an issue with the “Download names & addresses” CSV download and this has been resolved so the information displays correctly on the CSV file.
