University of Canterbury, Mathematics Summer Camp, 6-12 July 2023

The University of Canterbury, UK, organizes a summer mathematics camp for students from all around the world.

In an active, hands-on format, students will be introduced to several branches of mathematics, including Linear Algebra, Calculus, Mathematical Economics, Abstract Algebra, Number Theory, Probability, Set Theory, and Cryptography.

Students will stay in university accommodation on the campus. They will attend lectures, work in the interest groups, meet with staff and current students, and find out about the amazing research happening at the university.

Each year, there are 60 places available, and students can apply from any country. A limited number of full scholarships is available to the best applicants.

Send an email to apply for the summer mathematics camp (150-200 words). In the email

- introduce yourself
- describe your education and science interests
- state why you would profit from the science camp
- ask a question

Word range: 150-200 words

Maximum points: 15

Deadline: March 15 into odevzdávárna
