Fixes:

- Isolated all the JBeam and materials so there should be no more spawning issues
- Sunroof selection (search sunroof in config for all parts)
- All openable nodes/triggers in correct places
- Added stretched tires and a common folder so wheels should spawn with them
- More configs
- Body glitching through the floor
- Front plate placement
- Front suspension placement
- Turbo selection
- Full clear taillights now functional
- Backup camera on trunk
- Other misc fixes
