

## Welcome to Camp Khan Math!

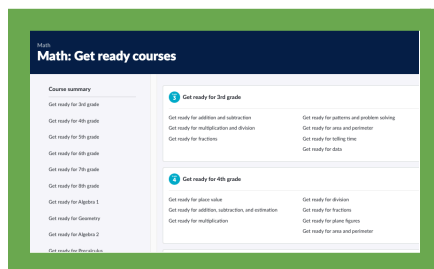

Summer is for passing time creatively with friends and family, trying new things, and recharging! We've got an exciting 15 minute a day program to prevent summer slide while keeping kids off screens as much as possible.

Camp Khan Math is a FREE summer challenge for you to complete 15-minutes of math practice throughout the summer.. This program will focus on the exact math skills that matter the most for the upcoming school year, setting you up for success, while only taking a few minutes out of your day. After the 15 minutes of math are over and the device is tucked away, you can continue to focus on summer fun.

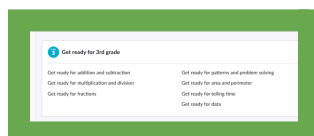

## How Camp Khan Math Works

### Get started:

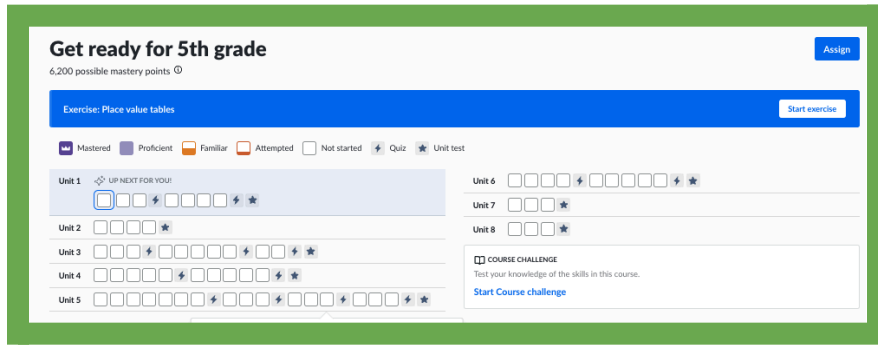

- 1) For Camp Khan, you will need to enroll in your upcoming grade level's [Math Get Ready Course](#). You will see Get Ready Courses for grades 3 - 8, Algebra 1, Geometry, Algebra 2, Pre-Calculus, AP Calculus and AP Statistics.

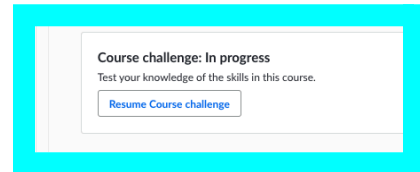

- 2) Enroll by selecting the Get Ready Course for your next year's grade or course.

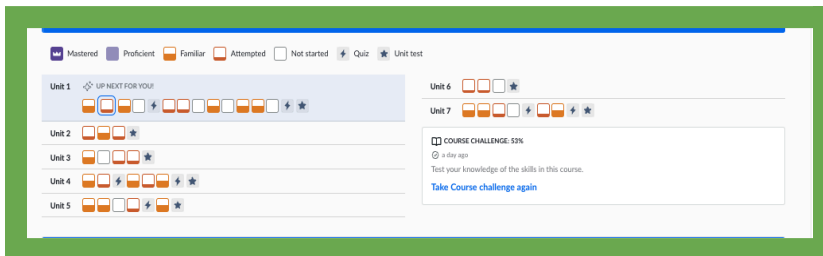

3) You will see all of the course content.

4) VERY IMPORTANT! To make sure you are using your precious summer minutes wisely, scroll down to the bottom of the page to find the course challenge. By taking the course challenge first, you will breeze past skills you're already comfortable with, and work on assignments that will make your math skills stronger. #worksmarter

5) After you have completed the course challenge (this may take longer than 15 minutes, so you can start back where you left off the next day) you will be ready to start your personalized Camp Khan Math Challenge.

6)
