Clocks

ALL PLAYERS ARE TO USE THE STOP CLOCK.

This event will use chess clocks (there are some at the venue but having an app on your phone or your own is a good works much better! – we would encourage you to use this method). The usual time allotted to each player will be 1 hour. Any player that runs out of the allotted time will not automatically lose; however, they will only be able to issue pivot orders. Their opponent will then continue to play until they finish their turn(s) or time out themselves. Additionally, a round clock will be used for all players, this will ensure the event to sticks to the advertised schedule. Once the round timer expires all games are to cease, results are to be calculated and provided to the TO

Scoring

All games will be scored as followed.

Scoring will be via the new Mantic Companion app if Internet allows it. We will use the Northern Kings system.

The games and scores will be live on the day so you can check them at any point.
