

# Agenda

## *Climate Change Vulnerability Assessment Workshop*

### *Local Government Climate Change Support Program 2017*

#### **Workshop Aim:**

Government officials need to drive the process of developing their own Climate Change Response Plans in order to ensure sustainability and implementation. However, officials often do not have the necessary resources, tools and understanding to develop these plans. This workshop therefore aims to provide the necessary tools, build capacity and provide support to key climate change champions in each area to begin to develop their own climate change response plans by starting with the first task of conducting a Vulnerability Assessment.

#### **Time:**

08:30 - 14:00

Time	Item	Responsible
