*The introduction section describes the background of the research problem including the existing literature about research problem (gap of literature), objectives of the study, research contribution and structure of article sections at the end of the introduction. Authors are also required to explicitly write a statement of originality (novelty), for example " Previous research have generally focused on ..... , however research that attempts to investigate the issue of ... is still limited especially in the context of ... therefore , the purpose of this research is to ... "(example of statement novelty).*

*Introduction should be written with rich literature support and it has to be concisely written. Citations must be included utilizing relevant citation software such as Mendeley. For research with qualitative design, authors are required to present research questions in the introduction section.*
