-When I googled for a product like this, what got my attention was the 15 days trial period and fast delivery, once I saw that I wanted to check it out.

Computer Eyewear RS

October 7, 2023

The screens of digital devices, telephones, computers and TVs, in addition to the reflection that tires the eyes, also emit artificial blue light, which brings with it a number of negative effects:

👁️ Eye strain: Blue light has high energy and penetrates all the way to the retina in the back of the eye, so eye fatigue easily occurs.

🌙 Sleep disturbance: Blue light interferes with the production of melatonin, the sleep hormone

⚠️ Potential eye problems: Exposure to blue light increases the risk of macular degeneration and future eye ... [Show more](#)

BLOCK BLUE LIGHT

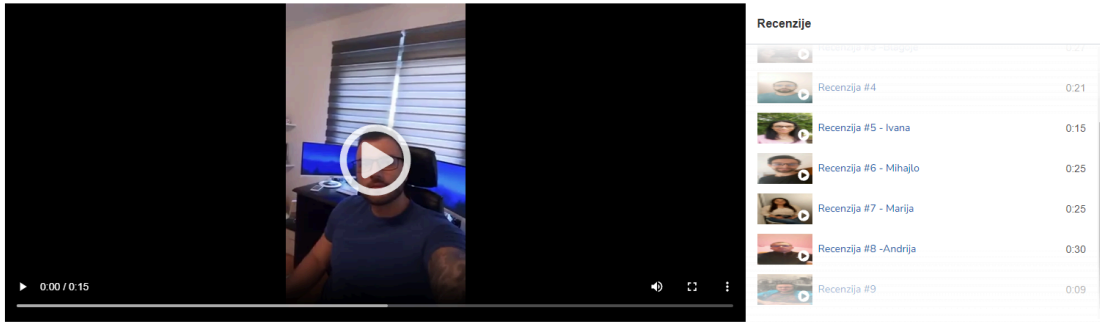

Computer
eyewear

-I think this AD is good to get passive attention because everyone is using different types of devices, scrolling and watching screens most of the day, everyday. In the picture we can see just 3 words that say it all and in the first sentence of the text it says what tires our eyes and what the negative effects could be which gives us a red alert to buy these eyewear so we do not lose our sight.

-Because of that it increases our desire to buy it as soon as possible since we already spend most of the time watching device's screens.

-It also increases our belief in this idea because we want to save our sight.

Vi ste rekli:

-There is also a website with feedback from other customers which helped me buy this product quicker.
