  - Overdrive e-books collection
  - Digital Resources galore!
- Epic! e-books, audiobooks, and Read-to-Me books
- Novel Effect App brings stories to life with interactive music and sound effects
- Highlights Magazines
- PBS Kids Games and Videos

Summer Math Ideas	
All Lower School Students	
Family game night	This is a great way to have fun with math! Many games encourage counting, flexible thinking, problem-solving, strategic thinking, multi-step problem-solving, spatial reasoning, pattern recognition, resource management … and so on! Here are a few of our favorites, and here are a few other sites with great ideas: • mindresearch.org • understood.org • discoverexplorelearn.com
Cook together	There's tons of math in cooking! From measuring the ingredients to setting the oven temperature and timer to determining how many portions a meal will make -- and it's fun too!
Calendar	Encourage your child to keep a calendar on the wall. Give your child a list of the events s/he will do this summer and put them to work by filling in the calendar. From time to time, ask your child calendar questions -- How many more days until Sunday? When do we go to the library? What day of the week is that? How many more days until school ends? And so on!
3rd Grade Students	
Pay with cash/coins	Encourage your child to save his/her own money and buy things on their own. By counting cash and coins for real-world reasons, their motivation to use money skills will surely stay fresh! And encourage them to determine change. If something costs $2.89 and your child pays with $3, how much change will they get back?
Facts	Math facts are often practiced with flashcards, but children learn facts best with manipulatives or by skip counting, *seeing* numbers as groups. Use objects (such as buttons or beads) to make groups -- see if your child can find all the different ways to make 10s or 20s for addition or make different groups for multiplication. Also, for x facts, make games out of skip counting -- race to see who can get to 70 first, counting by 7s. Or skip count by 4's while you walk together. Children have an easier time learning the facts if they know strategies. • Strategies for Addition • Strategies for Subtraction • Strategies for Multiplication
Summer Math Skills Review Workbook	This summer review book provides a review of the grade level just completed. Because most lessons only take about 20 minutes, students can easily fit them into their busy summer schedules without added screen time. It includes tutorial pages for students to review the mechanics of each type of problem encountered in the book. An answer key is also included for grades 1-3. Solution pages are included for 4th grade and up. To purchase the workbook online for $19.99, click here and purchase the workbook for the grade level that your child just completed.
Analog watch	If your child doesn't have one - buy one and ask them often to tell time and practice elapsed time -- for example, if you're heading to the park at 10:00, and it's 8:30, ask them how much longer until you need to leave.

Third-Grade Supply List 2026-2027

School Supplies can be purchased through Louisiana Office Supply. Ordering instructions will be sent at a later date.

- Pencils Sharpened 12CT (4 packs)
- Composition Book 100P Black Mead (1)
