My friend makes $60K/year in Lagos.

He tried to buy $500 of Tesla stock last year.

His broker rejected him. Not because he couldn't afford it.

But because his passport was issued 3,000 miles from Wall Street.

Today, @_lumeapp changes that. 🫙 🔻

THE PROBLEM

Here's what global markets actually means if you're not American:

➙ Wire $1,000 → Arrive with $927 (FX rape + fees)

➙ KYC takes 11 days → Miss the entry you wanted

➙ Finally approved → Can't buy fractional shares

➙ Want to sell? →Wait 48hrs for settlement

THE SHOCKING REALITY

$54 TRILLION sits in U.S. equities.

5.2 BILLION people live outside the United States.

But only 3% of non-US investors can easily access NYSE/NASDAQ.

Because the system was designed in 1792 for people who could physically show up to Wall Street.

THE BRIDGE

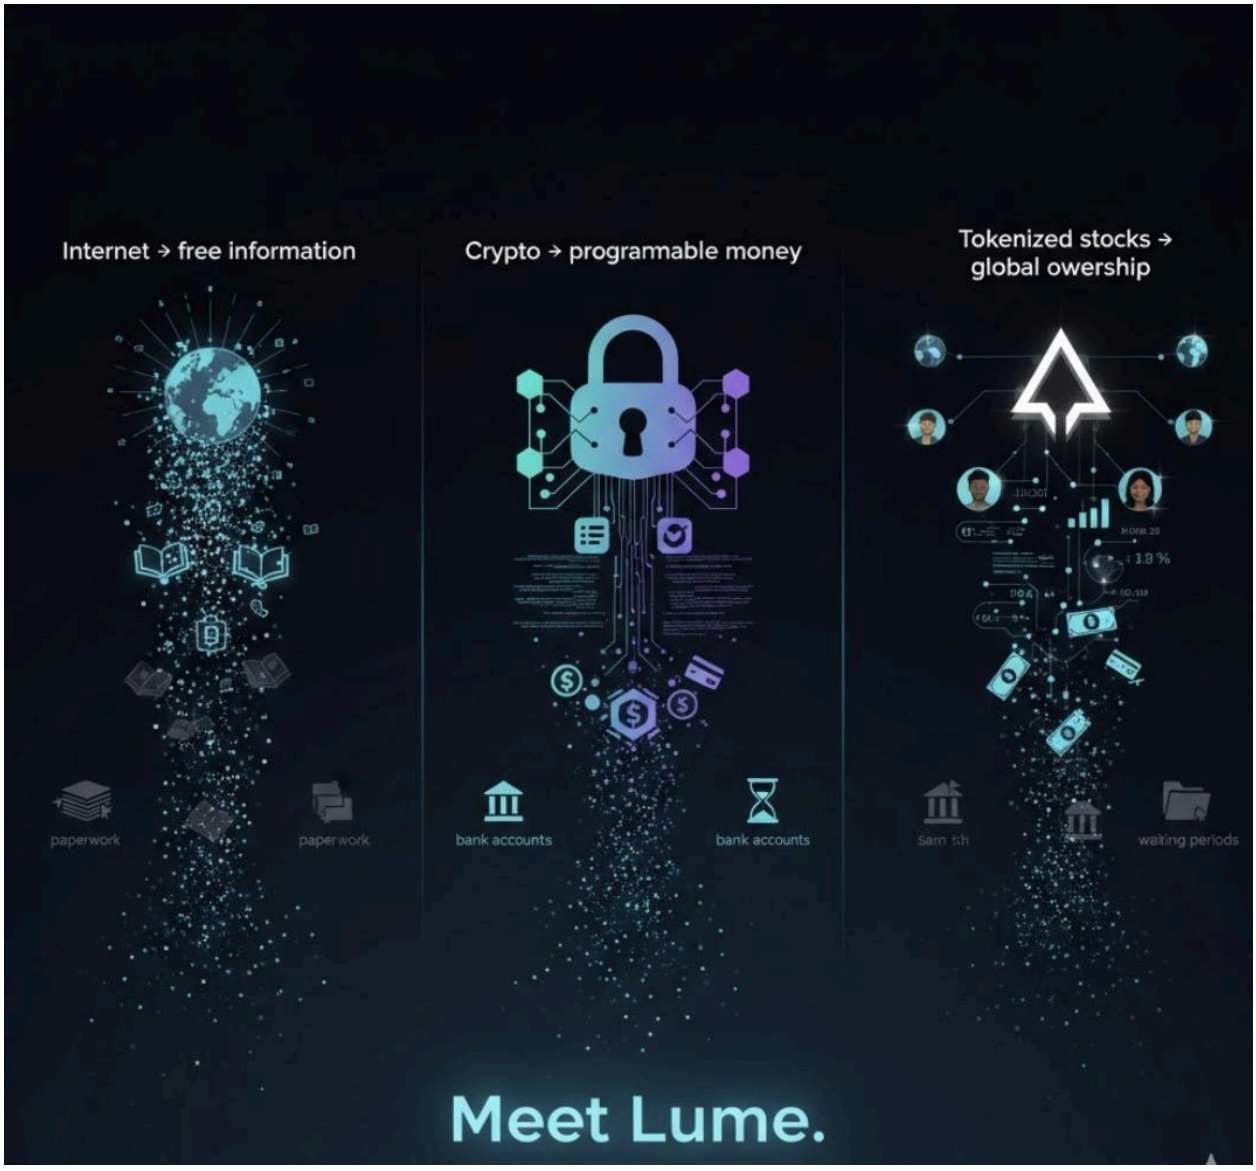

The internet made information free.

Crypto made money programmable.

But somehow, owning a piece of the world's best companies still requires:

- A US bank account
- 47 pages of paperwork
- 2 weeks of waiting

We're fixing this. Meet @_lumeapp

.

WHAT @_lumeapp ACTUALLY IS

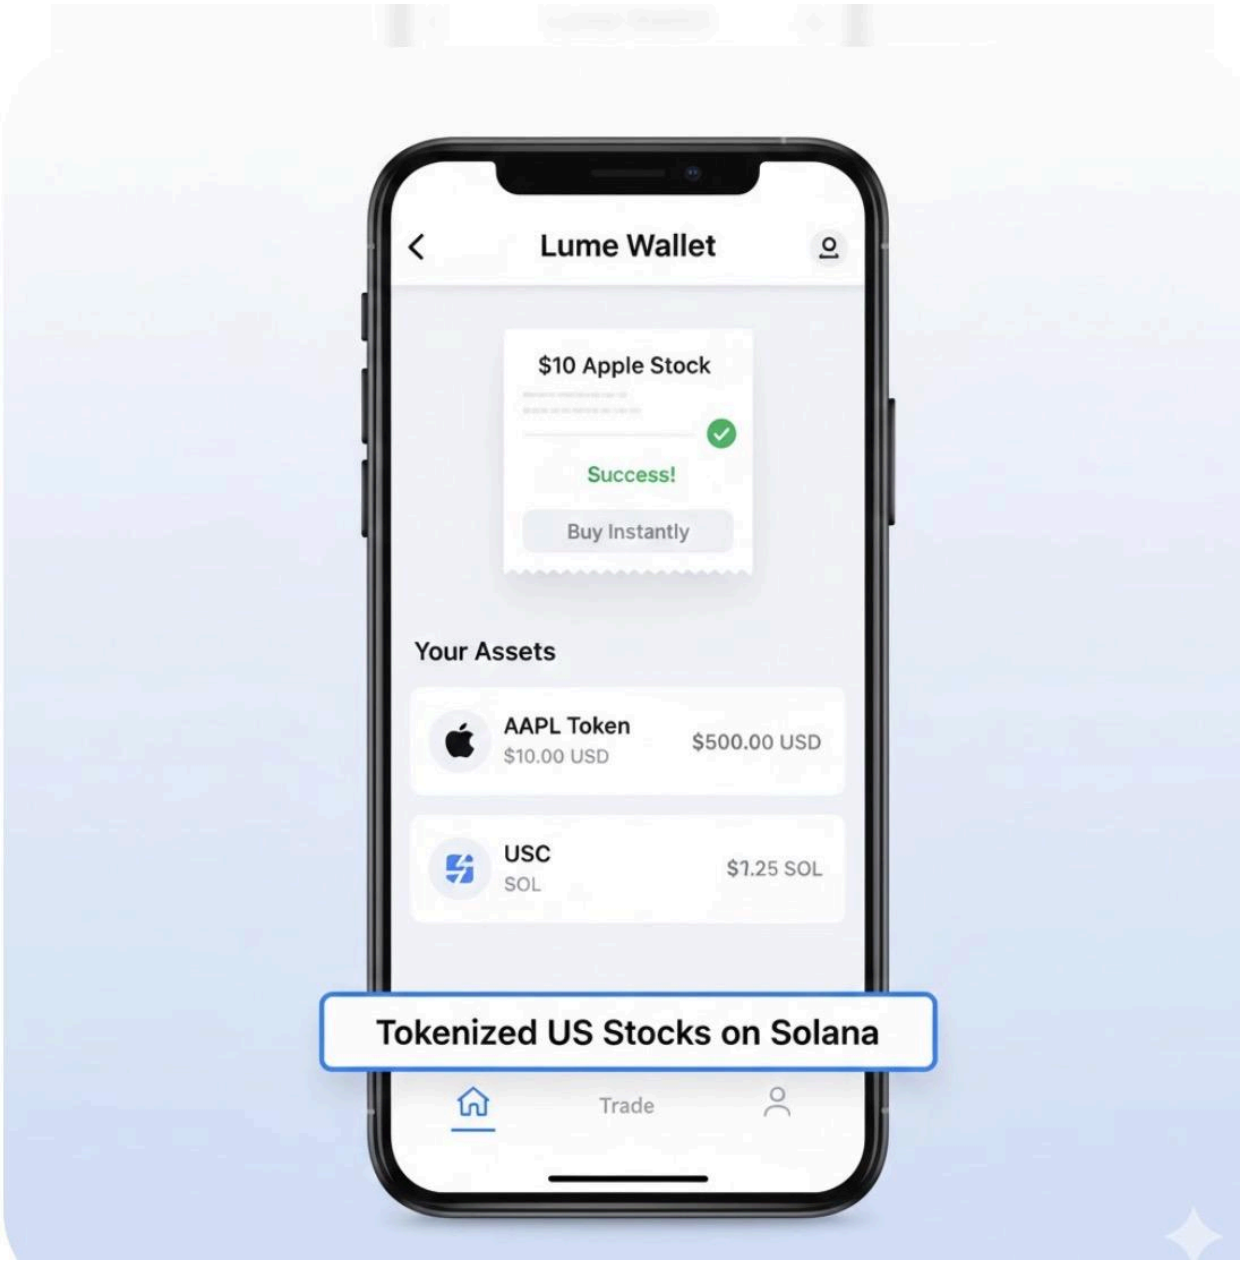

Lume = Tokenized US stock exposure on Solana

What this means in practice:

You can buy $10 of Apple stock in 8 seconds. From your phone.

The stock tokens live in your wallet like USDC or SOL.

The barrier between I have exposure just dropped to zero.

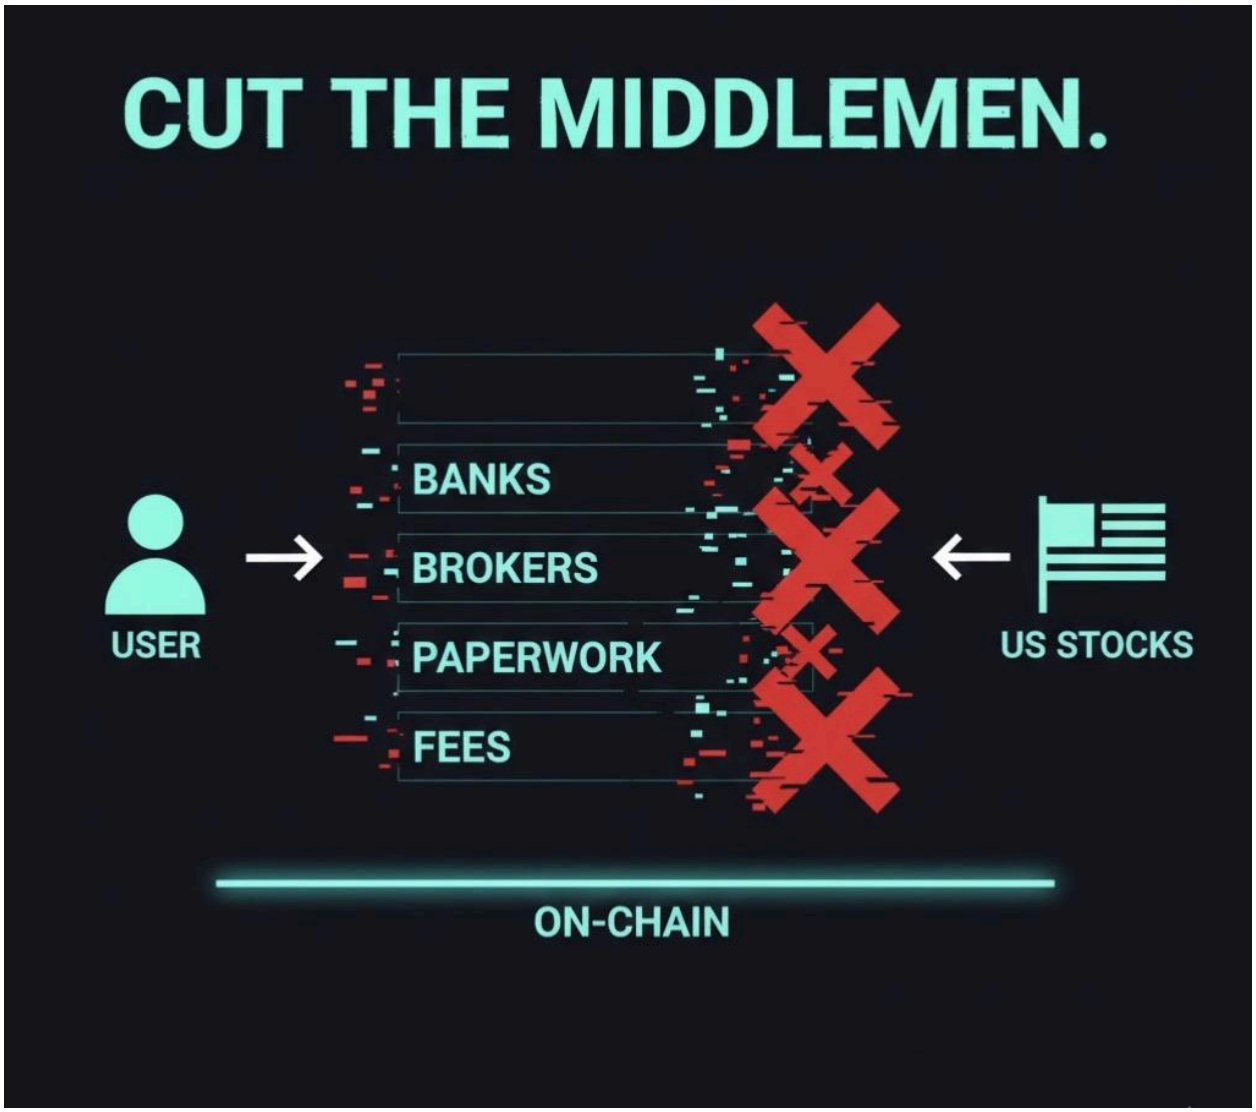

THE INSIGHT

Hot take: Tokenization isn't about disrupting finance.

It's about deleting the middlemen who add zero value but extract maximum rent.

Every KYC form, every wire fee, every settlement delay is just friction that exists because brokers built the system for themselves

SOCIAL PROOF + FEATURES

What you can do right now:

➙ Trade AAPL, TSLA, NVDA, MSFT + 50 more tickers

➙ Buy fractional (yes, $5 worth)

➙ + prediction markets for macro events

➙ + social trading with on-chain rep

Early users are already in from 47 countries.

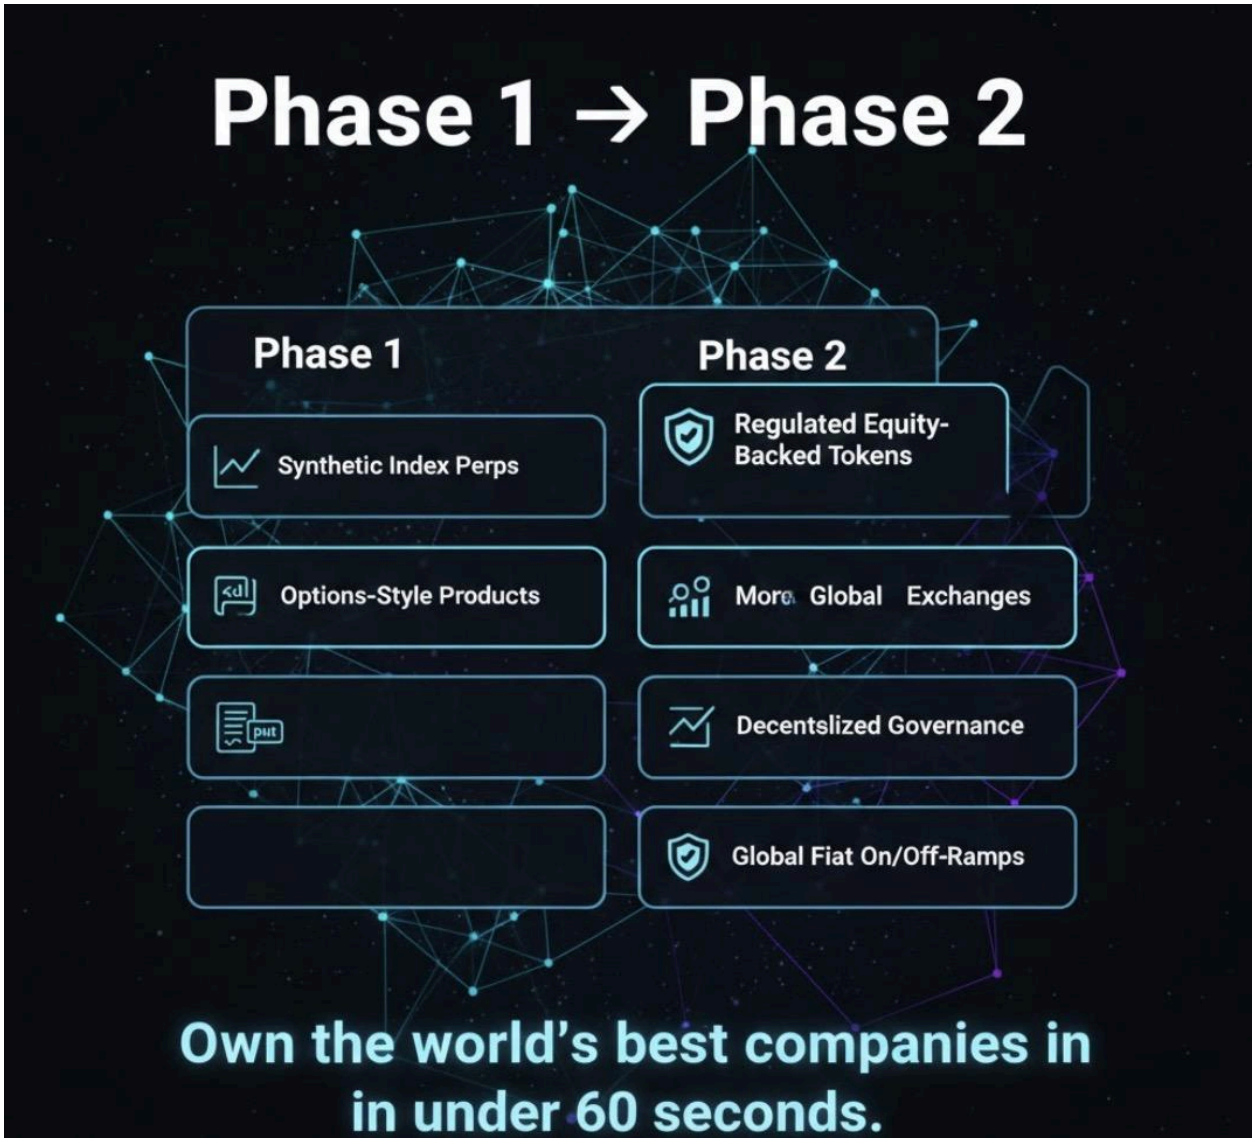

THE URGENCY

This is Phase 1.

Next 6 months: → Synthetic index perps → Options-style products
→ Co-issued regulated tokens with real equity backing

The vision: Every human with a phone should be able to own the best companies in the world in under 60 seconds.

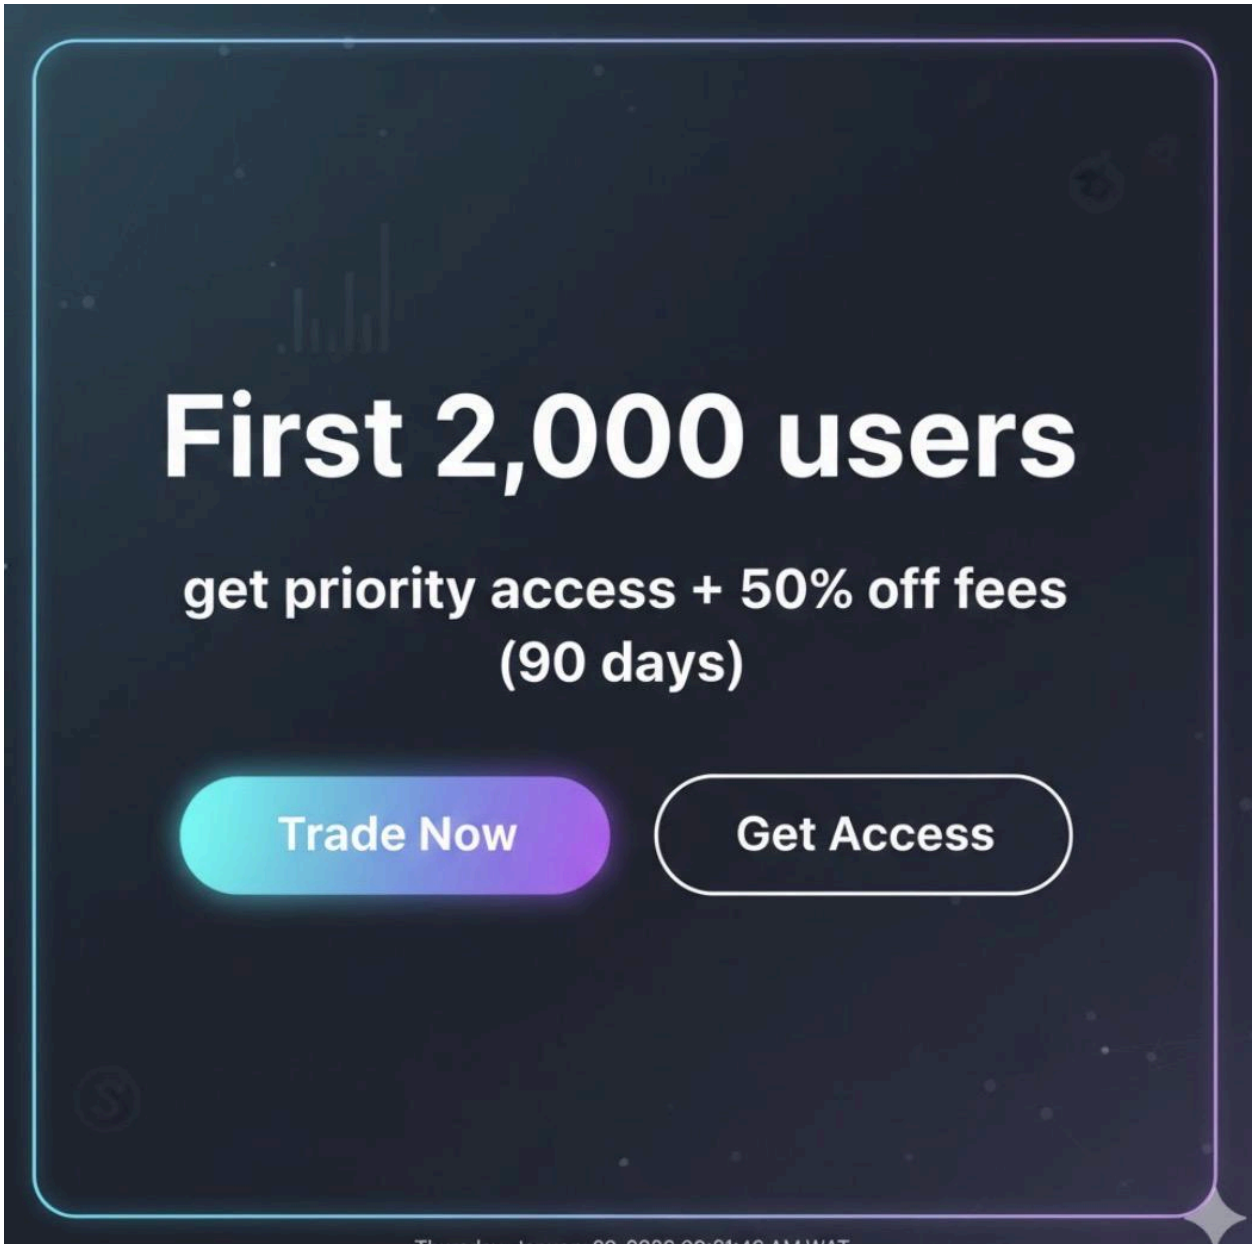

First 2,000 sign-ups get:

Priority access to new tickers, and 50% off trading fees for 90 days
