INTRODUCTION/PENDAHULUAN (Times New Roman, 12pt, bold, all caps)

(The Introduction should state background of problems and the main purpose of study along with its significance, novelty, and arguments). The purpose of this section, as the word itself indicates, is to provide readers with an introductory background to the study and hence to smoothly lead into a description of the methods employed in the current investigation. The introduction must therefore contain (shortly and consecutively) a general background of the problem that the authors investigate. It should give readers enough information to understand and consider authors' specific objectives within a larger theoretical framework or broader relevant discussion. While placing the current work in a broader context, authors should state clearly about the position of the current research among previous relevant research(es) in literature review (state of the art) as the basic of the brand new research questions.

In the scientific article format, it does not allow to write down the references as in the research report. They should be represented in the literature review to show the brand new of the scientific article. Besides, all background information gathered from other sources must,

of course, be appropriately cited so that the novelty, originality and state of the art of the current research are clearly known. In the final part of the introduction, the purpose of the article writing should be stated as well as its basic argument or thesis statement. (Times New Roman; 12 pt, 1.15 space)

The manuscript is typed on A4 paper size, margins follow the following format:

Top	: 3cm	Bottom	: 3cm
Left	: 3cm	Right	: 3cm
Header	: 2cm	Footer	: 2cm

The citation writing refers to the *Turabian 9th edition style model (full note)*. This journal accepts manuscripts for citation using the Zotero application Zotero (<https://www.zotero.org/download/>) atau Mendeley desktop (<https://www.mendeley.com/download-desktop/>).

METHOD/METODE (Times New Roman, 12pt, bold, all caps)

(Methods should be described in detail practically instead of conceptually). The Methods section contain enough information to enable the readers to understand what practically was done. Avoid to give too long conceptual explanation about what a certain method, approach, or research type mean. Instead, accentuate the explanation on how the data was obtained, coded, and analyzed. This is also the space in which the authors, if necessary, can explain reasons for choosing any specific theoretical framework for the current research they are doing. (Times New Roman; 12 pt, 1.15 space).

FINDING AND DISCUSSION/HASIL DAN PEMBAHASAN (Times New Roman, 12pt, bold, all caps)

(A concise, precise and structured description of the result, both the main and supporting ones, should be provided. It is then followed by critical discussion using relevant theoretical framework or perspective from previous relevant research (es) in the broadest context possible). (Times New Roman; 12 pt, 1.15 space)

(All tables and figures should be cited in the main text as Table 1, Figure 1, etc.). Table 1 summarizes the formatting requirement.
