

# Faverolles Hatch #1

September 30, 2011 - October 21, 2011

Egg #	Description & Notes
1	49g. Light colored. Looks intact. Air pocket floats freely. <b>Weird hot wax-like globs on egg 10/3/11 CULLED 10/3/11</b>
2	55g. Soiled. Feels rough, air pocket floats wildly, like a bubble in a level. <b>CULLED 9/30/2011</b>
3	53g. Smooth. Air pocket looks attached- doesn't swim around. <b>Definite Blood Vessels Beginning on Day 5 10/4/11 Blood vessels seen on beginning of day 7 10/06/11 Definitely growing, bit of a pyramid shape, like Egg 15. 10/8/11 Egg looks like it's filling up! 10/10/11 Not as full as #13 or #15, kind of sloshy, lots of space. Much bigger egg though. Still something in it? 10/13/11 Glob-like- lots of veins, sloshy, no growth from last time. CULLED 10/16/11</b>
4	50g. Smooth, clean, creamy tan egg. Air pocket looks attached. <b>Day 5- blood vessels from top 10/4/11 Very difficult to see in, but appears to have blood vessels on the top. 10/6/11 Still difficult to see, but dancing embryo! 10/8/11 Definitely growing. 10/10/11 Almost full! 10/14/11 Totally dark. 10/16/11</b>
5	54g. Smooth, clean, air pocket looks attached. <b>Dark mass in egg. Maybe blood vessels? 10/4/11 Dark mass in egg. Lower hemisphere. 10/06/11 Not sure if it's developing. Blood ring or vessels? Not sure. 10/8/11 Shadow of something growing- perhaps previous confusion was due to a thicker shell blocking light? Could be viable.. 10/10/11 Hard to tell... looks like something but still not sure. 10/13/11 No change from last candle. CULLED 10/16/11</b>
6	43g. Small- very smooth. Healthy looking. Air pocket is attached. <b>Unsure if developing. 10/4/11 Death ring. 10/06/11 CULLED 10/06/11</b>
7	42g. Smooth, clean, longish and pointy. Air pocket moves a bit, but not too badly. <b>Blood vessels! 10/4/11 Definite development. 10/06/11 Dancing! Such an active embryo! 10/8/11 Getting full. Looks fantastic. 10/11/11 Still growing! Almost full egg. 10/13/11 Pretty dark- just a little room on bottom. Val thought he saw movement! 10/16/11</b>
8	45g. Round, globe-like. Air pocket moves freely. <b>Uncertain if developing. 10/4/11 Embryo! 10/06/11 Weird dark spot, looks like veins growing, branching out of dark ring. 10/8/11 Kind of odd, but no blood rings. Not as full as others, but still looks like there might be an embryo. 10/10/11 No change in appearance. Doesn't appear to be growing. 10/13/11 No change from last time, no obvious embryo. CULLED 10/16/11</b>

9	52g. Light, powdery exterior. Air pocket freely floats. Soiled on end. <b>CULLED 9/30/11</b>
10	55g. Clear, longish but still egg-shaped. Air bubble shifts slightly, but otherwise looks good. <b>Dark mass. Uncertain if developing. 10/4/11</b> Looks empty. <b>10/06/11 CULLED 10/06/11</b>
11	44g. Small, a bit porous. Hard to tell which end is which. May be a quitter. <b>Saw line, looked like blood ring. 10/4/11</b> Death Ring more apparent. <b>10/06/11 CULLED 10/06/11</b>
12	50g. Long- air pocket floats freely. A bit porous. <b>Not sure if developing. Super loose air pocket. 10/4/11</b> Death ring(?) beginning on Day 7. <b>10/6/11 Looks like definite blood ring. Perhaps this is from the same hen as #5? 10/8/11</b> I can see a shadow, but no distinct blood vessels. <b>10/10/11</b> Looks the same as before. Hard to tell if anything is going on. Lots of room inside of egg. <b>10/13/11. No change from last candle. CULLED 10/16/11</b>
13	46g. Looks intact. Great condition. <b>Obvious embryo. 10/4/11</b> Obvious Embryo! Definitely least shy of all. <b>10/06/11 Great veins! 10/8/11</b> Definitely growing! <b>10/10/11</b> Nearly full, definitely still growing. <b>10/13/11</b> Completely dark. <b>10/16/11</b>
14	52g. Longish. Looks good. Intact bubble. <b>Healthy embryo 10/4/11</b> Bizarre embryo- definite vessels on top, air gap on sides. Clearly developing though. <b>10/6/11 Beautiful veins. Another upside down V shape. 10/8/11</b> Definitely growing! <b>10/10/11</b> Nearly full, growing steadily! <b>10/13/11</b> Completely dark! <b>10/16/11</b>
15	44g. Beautiful egg. Bubble doesn't shift. <b>Another obvious embryo! 10/4/11</b> Embryo is very easy to see. Looks healthy. <b>10/6/11 Weird upside down V- Still growing though! 10/8/11</b> Definitely growing! <b>10/10/11</b> Nearly full, looking great. <b>10/13/11</b> Completely dark! <b>10/16/11</b>
16	43g. Weird oval shape- no distinct point on either end. Looks intact. <b>Definite blood vessels. 10/4/11</b> Definite embryo! <b>10/6/11 Looks good, lots of veins. 10/8/11</b> Getting full! Looks like it's developing well. <b>10/10/11</b> Filling up- more room than #7, but less empty space compared to #3 or #8. <b>10/13/11</b> Completely dark! <b>10/16/11</b>
