

## District Instructional Leadership Network

### 2026-2027

**The goal of the District Instructional Leadership Network is to...** *foster a vibrant experience that empowers education colleagues with professional learning, resources, and collaboration, thereby enhancing student learning outcomes and educational practices. Through meaningful connections and shared expertise, we commit to cultivating a supportive network that embraces innovation, equity, and continuous improvement in how we serve our school communities. While the format of networks can vary, the goal is to create a collaborative space that results in improvement within systems.*
