Update on Rafael's Progress

Rafael has struggled physically over the past few months. He had to have a medical procedure done in late Spring due to an issue with his testical. He's better now, but he has other health problems. He still doesn't love physical therapy, but he does it begrudgingly, with focus on stretching out his muscles. He does enjoy watching movies and hanging out with his friends. Thank you for your continued support which helps enable us to give him the best quality of life possible.
