

Hello Students!! Today I am profiling an article from US News & World Report discussing some of the hottest career/job fields for 2020. We all know that this has been a banner year already, to say the least. But let's change our focus for a minute and look into the future and at the bright side of things, to the fields listed in this article. I would like to highlight Software Engineer and point out it is currently listed as the #1 Best Job.

<https://www.usnews.com/info/blogs/press-room/articles/2020-01-07/us-news-reveals-the-2020-best-jobs>

Our highlighted Career Fair presenter is:

Kumba Molino is a Software Engineer at JP Morgan Chase. JP Morgan Chase is one of the oldest and largest banking and financial institutions in the United States. Kumba earned a Bachelor's degree from Drexel University. On a day to day basis, she is involved in meetings with stakeholders, systems development and ping pong. Ping pong is a software algorithm that provides the user the ability to alternate between two computers and allows communication between partners, network paths or file blocks. Companies hiring software engineers are seeking young adults with a strong technology skill set and are forward thinking. Kumba advises you to you always do your best because it all matters. She also says, don't doubt your potential. Challenge yourself because a challenge is more personally rewarding.

Feel free to contact the Career Counselor in your building or your School Counselor with any questions.
