Will pass the info along - Zel

Chicago - patients in all 50 states

Have had a few organ transplant cases

Does functional med in NY LabCorp

Mistletoe therapy; A lot of success with mistletoe therapy

Vitamin C helping

Sodium bicarbonate infusions helping (cancer)

Hydroxychloriquine or ivermectin

If kidney transplant then lower the dose

Should be on prophylaxis in that case

Ivermectin too

Everyone is case by case

Use hydroxy as baseline in transplant patients

Everything interacts with everything. If someone is critical there is no choice

2 immunosuppressants

It's not black and white

Doesn't give advice on it, believes it's a personal decision

A few organ transplant/immunocompromised have gotten a COVID vaccine

Treats symptoms rather than vax/not vax

Focuses on symptom management
