ABSTRACT

A structured abstract (not more than 250 words). The abstract summarises the major aspects of a paper (see INTEL Structured Abstract).

Purpose – Reason/aims of paper. State the background of the study. **Methodology** – State the research design, sampling design, sample size, research procedure(s) including intervention, instrument, and data analysis. **Findings** – State the main results of the study. Numerical data may be included but should be kept to a minimum. State the conclusions and implications. **Novelty** – State the originality/contribution of the research. **Significance** – Who would benefit from this study?

Keywords: List 5-7 keywords. Alphabetically sorted; Capitalized first word; From A to Z; Maximum 7 keywords; Mathematics education; Sentence case; Separate by semicolon (;) between keywords.

How to cite: Author 1, Author 2, and Author 3. (Year). Title. *Indonesian Journal of Teaching and Learning*, Vol(Number), xx-xx, <https://doi.org/10.56855/intel.v1i1.00>

Acknowledgments

Acknowledge individuals or institutions that supported the research but do not meet the criteria for authorship. This may include advisors, research assistants, language editors, proofreaders, technical personnel, data collectors, participating institutions, or organizations that provided facilities or materials. Financial support must be reported separately under the Funding Statement.

Declarations

- Author Contributions : Describe each author's contribution using the [CRediT Contributor Roles Taxonomy](#). Example: Author 1: Conceptualization, Writing – Original Draft, Editing, and Visualization; Author 2: Methodology, Formal Analysis, and Writing – Review & Editing; Author 3: Validation and Supervision. Include only contributions actually performed by each author.
- Funding Statement : Identify the official name of every funding organization and provide the grant number and year where available. Example: This research was funded by [name of funding organization] under grant number [number], awarded in [year]. If no funding was received, state: "This research received no specific grant from any funding agency in the public, commercial, or not-for-profit sectors."
- Conflict of Interest : Disclose any financial, institutional, professional, academic, or personal interests that could influence the research or its interpretation. If no conflict exists, state: "The authors declare no conflicts of interest."
- Data Availability : Explain whether the data, instruments, code, or supplementary materials supporting the findings are publicly available, available upon reasonable request, restricted, or unavailable. Include the repository name and DOI or persistent URL when applicable.
- Additional Information : Identify any supplementary files or additional materials associated with the article and explain where they can be accessed. If none exist, state: "No additional information is available for this article."
- Generative AI Declaration: Authors must disclose any use of generative artificial intelligence (AI) tools in the preparation of the manuscript. The declaration should identify the tool used and briefly explain its purpose. Generative AI tools must not be listed as authors and must not replace the authors' responsibility for the accuracy, originality, integrity, and interpretation of the manuscript. If generative AI was used only for language improvement, an appropriate statement is: "Generative AI tools were used solely for language editing and improving the clarity of the manuscript. The authors reviewed and verified all AI-assisted output and take full responsibility for the final content." If no generative AI tool was used, state: "The authors declare that no generative AI tools were used in the preparation of this manuscript."
