<https://energymag.net/internships/>

EnergyMag offers internships to high school AND college students. Students will be asked to research and analyze a specific company, technology, market, or similar activities. Students will be provided a mentor who will brief, help, and supervise them.

Requirements for high school interns:

- sophomores, juniors and seniors only
- at least one honors science or honors English class, although we will make exceptions in appropriate cases
- GPA over 3.25
- an application explaining why EnergyMag should grant you an internship. What counts to us: your passion, your focus, your academic record, your personality, the likelihood that your work will help you grow and help the world become a better place.
- a skype or voice interview
- upon request, a writing sample.
- upon request, a listing of your academic record (does not have to be an official transcript).

Requirements for college interns:

- an application explaining why EnergyMag should grant you an internship. What counts to us: your passion, your focus, your academic record, your personality, the likelihood that your work will help you grow and help the world become a better place.
- a skype or voice interview
- upon request, a writing sample.
- upon request, a listing of your academic record (does not have to be an official transcript). We expect a GPA above 3.0.
- upon request, the contact info for your academic adviser

Note: The below points elaborate on the Docs I've already shared above. They were the suggestions/conclusions we drew during our meeting the last time and some new areas I want to add in respect to the ones you will add after reviewing the prompts I've sent. Please disregard any wrong suggestion I make.
