

Check if your article aligns with the [focus of this journal](#). The focus of this journal, as indicated by its name, is the Indonesian Accounting Review. Also, showcase the novelty of your research. We prefer to accept high-quality articles that inspire accounting practices in Indonesia or Indonesian-style accounting articles that highlight the uniqueness of Indonesian accounting, which will be presented to a global audience.

For consistency, please use American English in writing.

Submitting an article through OJS demands your utmost attention to detail. It is imperative that you meticulously follow each step, ensuring that both the form and your documents are precisely adjusted as per OJS requirements. For the blind review process, it is crucial to remove the author's name before submission. Failure to do so will result in automatic rejection. Adhering to these guidelines is not just a recommendation; it is essential for the successful consideration of your work.

Instructions for Authors in OJS 3.5

During the registration and manuscript submission process in OJS 3.5, **each author is required to provide a correct and active email address**. It is essential that the email used is either a personal or professional account that is regularly accessed, as a valid email address is necessary for the ORCID iD confirmation process, which will be automatically displayed in the author metadata. The journal system will dispatch an ORCID confirmation link to the registered email address; therefore, the author must have access to that email to complete the verification process.

ORCID iD Confirmation

Authors are encouraged to possess and utilize a valid ORCID iD. They should examine their email after submission to locate the ORCID confirmation email sent by the journal system and follow the confirmation link provided until the verification process is finalized. A verified ORCID iD will be automatically displayed on the article page and author profile, thereby enhancing the author's academic identity and assisting in indexing.

Author Short Biography

To expedite and facilitate the publication process, each author is required to provide a concise biography during manuscript submission, which should include their full name and institutional affiliation (such as institution, faculty, or department), area of expertise or primary field of research, and any other pertinent brief information, such as academic position or research experience. This brief biography will be utilized and displayed on the published article page, enabling readers to learn about the author's identity and expertise.

Summary of Author Obligations

Adherence to the aforementioned instructions will facilitate the expediting of the editorial and publication procedures, while also ensuring that author information is presented in a comprehensive and precise manner within the journal.

Title: It should reflect the content, clear, and attractive title

Do not place the author names here. Provide them in a separate file called "Author Biography.DOCX."

INTRODUCTION

Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering (Berkman 1994).

THEORETICAL FRAMEWORK AND HYPOTHESES

It describes the previously related studies as the primary sources. The use of secondary sources of references should not dominate the total references. Quotation should be maximally one paragraph and/ or the gist of the quoted sources. It describes the previously related studies as the primary sources. The use of secondary sources of references should not dominate the total references. Quotation should be maximally one paragraph and/ or the gist of the quoted sources. It describes the previously related studies as the primary sources. The use of secondary sources of references should not dominate the total references. Quotation

should be maximally one paragraph and/ or the gist of the quoted sources (Australian Government Publishing Service 1987).

RESEARCH METHOD

It comprises the procedures or steps of the research, e.g., from the methods of sampling to the data analysis, and presented in brief and concisely by numbering. It comprises the procedures or steps of the research, e.g., from the methods of sampling to the data analysis, and presented in brief and concisely by numbering. It comprises the procedures or steps of the research, e.g., from the methods of sampling to the data analysis, and presented in brief and concisely by numbering.

Do not display hypothesis images that contain letters H1, H2, and so on. Make the image into a model that describes the research to be conducted.

DATA ANALYSIS AND DISCUSSION

Research articles are not research reports. Do not display tables of analysis results from statistical software; recreate the tables in a simple way and explain them with descriptive narration. There should be no vertical lines in the tables.

It presents the analysis of the related results, theories, and hypotheses (if any) based on the writer's reasoning. Data analysis and discussion should be presented in brief but clear and it is not dominated by table presentation. The tables which are presented should not be the rough output but in the processed and brief summary. Tables and pictures are presented consistently in the center and the titles are above for the tables and below for the pictures. Bourassa (1999) emphasized it presents the analysis of the related results, theories, and hypotheses (if any) based on the writer's reasoning. Data analysis and discussion should be presented in brief but clear and it is not dominated by table presentation. The tables which are presented should not be the rough output but in the processed and brief summary. Tables and pictures are presented consistently in the center and the

titles are above for the tables and below for the pictures change (Bowden and Fairley 1996).

CONCLUSION, IMPLICATION, SUGGESTION, AND LIMITATIONS

It is the closing of the article which reflects the essence and reasoning of the research by the writer. It is also logically based on the evidence taken from, and presented by the writer in paragraphs. Implication, limitations, and suggestions are also presented in paragraphs without numbering. It is the closing of the article which reflects the essence and reasoning of the research by the writer. It is also logically based on the evidence taken from, and presented by the writer in paragraphs. Implication, limitations, and suggestions are also presented in paragraphs without numbering.

ACKNOWLEDGMENT

Write a thank you note if you have received funding for this research and where you obtained the funds.

Conflict of Interest

I declare that I am free from conflicts of interest in this research, whether financial, professional,

personal, organizational membership, relationships with relevant entities, or personal beliefs related to this research topic.

Use of Artificial Intelligence Technology

Disclose if you use AI in the Acknowledgment. Specify the AI tool used and the purpose of its usage. Spelling or grammar correction tools and reference managers such as Mendeley are not included in this specific disclosure requirement.

REFERENCES

Use references from the last approximately 5 years, 80% of which should refer to credible Scopus-indexed journals. Also display the DOI reference identity of each article you use as a

reference. This is to store cross-linked data Crossref. The method of writing references refers to APA VERSION 7. Example:
