

Title: It should reflect the content, clear, and attractive title

Check if your article aligns with the [focus of this journal](#). The focus of this journal, as indicated by its name, is the Indonesian Accounting Review. Also, showcase the novelty of your research. We prefer to accept high-quality articles that inspire accounting practices in Indonesia or Indonesian-style accounting articles that highlight the uniqueness of Indonesian accounting, which will be presented to a global audience.

For consistency, please use American English in writing.

Submitting an article through OJS demands your utmost attention to detail. It is imperative that you meticulously follow each step, ensuring that both the form and your documents are precisely adjusted as per OJS requirements. For the blind review process, it is crucial to **remove the author's name before submission**. Failure to do so will result in automatic rejection. Adhering to these guidelines is not just a recommendation; it is essential for the successful consideration of your work.

Clearly fill in your personal details (including a brief biography and email) in the form when you first submit the article. Also provide the order of authors (if there is more than one) and their email addresses as well as brief biographies of all authors, or **send them in a separate file (author biography file)**. For each author, it is mandatory to include Biography, Full Name, Email Address, Institutional/University Affiliation, and ORCID Number (You can register for free at the website <https://orcid.org>)

INTRODUCTION

Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering (Berkman 1994).

THEORETICAL FRAMEWORK AND HYPOTHESES

It describes the previously related studies as the primary sources. The use of secondary sources of references should not dominate the total references. Quotation should be maximally one paragraph and/ or the gist of the quoted sources. It describes the previously related studies as the primary sources. The use of secondary sources of references should not dominate the total references. Quotation should be maximally one paragraph and/ or the gist of the quoted sources. It describes the previously related studies as the primary sources. The use of secondary sources of references should not dominate the total references. Quotation should be maximally one paragraph and/ or the gist of the quoted sources (Australian Government Publishing Service 1987).

RESEARCH METHOD

It comprises the procedures or steps of the research, e.g., from the methods of sampling to the data analysis, and presented in brief and concisely by numbering. It comprises the procedures or steps of the research, e.g., from the methods of sampling to the data analysis, and presented in brief and concisely by numbering. It comprises the procedures or steps of the research, e.g., from the methods of sampling to the data analysis, and presented in brief and concisely by numbering.

Do not display hypothesis images that contain letters H1, H2, and so on. Make

the image into a model that describes the research to be conducted.

DATA ANALYSIS AND DISCUSSION

Research articles are not research reports. Do not display tables of analysis results from statistical software; recreate the tables in a simple way and explain them with descriptive narration. There should be no vertical lines in the tables.

It presents the analysis of the related results, theories, and hypotheses (if any) based on the writer's reasoning. Data analysis and discussion should be presented in brief but clear and it is not dominated by table presentation. The tables which are presented should not be the rough output but in the processed and brief summary. Tables and pictures are presented consistently in the center and the titles are above for the tables and below for the pictures. Bourassa (1999) emphasized it presents the analysis of the related results, theories, and hypotheses (if any) based on the writer's reasoning. Data analysis and discussion should be presented in brief but clear and it is not dominated by table presentation. The tables which are presented should not be the rough output but in the processed and brief summary. Tables and pictures are presented consistently in the center and the titles are above for the tables and below for the pictures change (Bowden and Fairley 1996).

CONCLUSION, IMPLICATION, SUGGESTION, AND LIMITATIONS

It is the closing of the article which reflects the essence and reasoning of the research by the writer. It is also logically based on the evidence taken from, and presented by the writer in paragraphs. Implication, limitations, and suggestions are also presented in paragraphs without numbering. It is the closing of the article which reflects the essence and reasoning of the research by the writer. It is also logically based on the evidence taken from, and presented by the writer in paragraphs. Implication, limitations, and suggestions are also presented in paragraphs without numbering.

ACKNOWLEDGMENT

Write a thank you note if you have received funding for this research and where you obtained the funds.

Conflict of Interest

I declare that I am free from conflicts of interest in this research, whether financial, professional, personal, organizational membership, relationships with relevant entities, or personal beliefs related to

this research topic.

Use of Artificial Intelligence Technology

Disclose if you use AI in the Acknowledgment. Specify the AI tool used and the purpose of its usage. Spelling or grammar correction tools and reference managers such as Mendeley are not included in this specific disclosure requirement.

REFERENCES

Use references from the last approximately 5 years, 80% of which should refer to credible Scopus-indexed journals. Also display the DOI reference identity of each article you use as a reference. This is to store cross-linked data Crossref. The method of writing references refers to APA VERSION 7. Example:
