1. Face data policy

1. What facial data does our app collect?

We analyze your photos and find the characteristic points of the face in the photo (such as eyes, nose, mouth points) for face processing. We do not collect facial data. After the analysis process is completed, all data will be deleted and no data will be saved.

2. What is the purpose of collecting this information?

In order to achieve the user's "dress-up" effect, the application needs to find feature points (such as eyes, nose, mouth points).

The complete process is:

- (1) You submit the selected photos to our server in an encrypted manner;
- (2) The server analyzes the face data in your photos and applies it to the template you choose;
- (3) After the synthesis is completed, the server will return the final rendering effect to you through the application;
- (4) The final result of the synthesis (i.e. your "work") will be stored in your mobile phone. After the synthesis process is completed, we will immediately delete the face image you submitted to the server.

3. Will the data be shared with any third parties? Where will this information be stored? How long will facial data be retained?

We will not share your facial data with any third party, nor will we store any facial information you submit. After the analysis process is completed, the photos you upload will be deleted.

2. How long will facial data be retained?

We will not store user facial data, and we will immediately discard any user information after the calculation based on our algorithm is completed.
