

LITERATURE REVIEW

Title

Author A.A.¹, Author B.B.², Author C.C.³, Author D.D.¹

¹ Department, institution/institute/university/clinic/hospital, city, country

² Department, institution/institute/university/clinic/hospital, city, country

³ Department, institution/institute/university/clinic/hospital, city, country

Author Information

Author A.A. Surname and initials; the highest academic or medical degree; affiliation (the name of the department(s) and institution(s) or organizations where the) for each author and its location, city, and country. E-mail address. ORCID number (Open Researcher and Contributor Identification)

Author B.B. Surname and initials; the highest academic or medical degree; affiliation (the name of the department(s) and institution(s) or organizations where the) for each author and its location, city, and country. E-mail address. ORCID number (Open Researcher and Contributor Identification)

Corresponding author: Surname and Name. Department, institution/institute/university/clinic/hospital, city, country. Postal address, city, code, country. Telephone. E-mail

Word count: 10-15 pages A4 (5000 words, excluding abstract, acknowledgments, tables, figure legends, and references)

Number of tables: specify the number of tables in the article.

Number of figures: indicate the number of figures in the article.

Abbreviations. All abbreviations used in the text of the article should be provided with their decoding.

Abstract

Abstract should not exceed 300 words.

Abstract should be unstructured.

Information in abstracts must not differ from that in the text. Authors should ensure that information is consistent in both places and that they accurately reflect the content of the article.

The summary should accurately reflect the content of the article with a brief outline and main points of the article.

It should be written clearly and concisely in a free form (without a specific structure).

Keywords

3-8 keywords or short phrases that reflect the main issues raised in the article according to MeSH (Medical Subject Headings).

The text of the article should be structured as follows:

- Introduction,
- The main part
- Discussion

Introduction

- Identify the topic and scope of the related literature to be reviewed;
- State the importance of the review - i.e., the point of view;
- state the scope of the review - what is included and what is not. Intentional exclusions should also be noted;
- Explain how the review is organised, i.e. its sequence

The main part

- The review should be organised according to one of the following principles: chronological, thematic or methodological;
- each work should be critically summarised and evaluated in terms of background, methodology and conclusions;
- it is as important to consider inconsistencies, omissions and errors as it is to identify accuracy, depth and relevance;

Conclusion.

- summarise the important aspects of the existing body of literature;
- assess the current state and accessibility of the literature reviewed;
- identify significant shortcomings or gaps in existing knowledge;
- identify areas for future research;
- link your research to existing knowledge.

References

Citations in the text, tables, and legends must be given by Arabic numerals in [square brackets] and numbered according to the reference list.

References should be numbered consecutively in the order in which they are first mentioned in the text.

The titles of journals should be abbreviated according to the style used for MEDLINE (www.ncbi.nlm.nih.gov/nlmcatalog/journals).

As recommended by ICMJE, references should follow the standards summarized in the NLM's Sample References (https://www.nlm.nih.gov/bsd/uniform_requirements.html) webpage and detailed in the NLM's Citing Medicine, 2nd edition (<https://www.ncbi.nlm.nih.gov/books/NBK7256/>).

Provide the links to articles on the title's website or article's DOI

Statements and Declarations

The following statements must be included in the text of the manuscript after the References section. Please note that submissions that do not include required statements will be returned as incomplete.

Funding

These include grants, equipment, drugs, and/or other support that facilitated the conduct of the work described in the article or the writing of the article itself. The funding statement should include only direct support of the work described. General institutional support for an author's time on the work should be distinguished from direct overall funding of the work.

Examples:

This study was funded by Company Name.

Author AA's time on the work was supported by Company Name.

This work was supported by Company Name (Grant numbers [...] and [...]).

Author AA has received research support from Company Name.

Company Name was involved in (list the stages in which the company was involved, e.g., study design, study conduct, data collection, data management, data analysis and interpretation, preparation, review and approval) of the manuscript.

The article was prepared with the financial support of Company Name, which was not involved in the design and conduct of this study.

This article was prepared with the financial support of Company Name, which participated in the collection, analysis, and interpretation of data.

The article is a part of the research work on the topic “Name of the research project”, registration number No123456789.

The authors declare that no funds, grants, or other support were received during the preparation of this manuscript.

Sources of support: none.

The sponsor or funding organization was not involved in the design and conduct of this study.

Conflicts of Interests

Please, include Disclosure of relationships and activities that are directly or indirectly related to the work submitted for publication. It must match your submitted Form for Disclosure of Potential Conflicts of Interest.

Examples:

Author A and B declare they have no financial interests.

Author C has received speaker and consultant honoraria from Company Name.

Author D has received research funding from Company Name and Company Name.

Author E has received travel support from Company Name.

Author F has served on advisory boards for Company Name.

The authors have no relevant financial or non-financial interests to disclose.

Author A.A. works as a consultant for Company Name.

The author's husband B.B. is the chairman of the board of directors of Company Name.

Author V.V. received a research grant from Company Name

Author G.G. has received lecture fees from Company Name

Author D.D. has a patent on “Patent Name and Number”;

Author E.E. has received compensation from Company Name for participation in several conferences;

Author J.J. has received honoraria for writing promotional materials for Company Name

Author Z.Z. has no conflict of interest.

The authors declare that they have no conflicts of interest that that could influence their opinion on the subject matter or materials described and discussed in this manuscript.

Author Contributions

A short statement detailing the contribution of each author to the research and preparation of the manuscript. should be included in accordance with the "Authorship Statement" form.

Examples:

Author AA: Reviewing and editing. Author BB: Conceptualisation; writing - design; formal analysis; writing - review and revision. Author VV: software; review and revision. Author GG: methodology; writing - reviewing and revising. Author DD: conceptualisation; writing - drafting; writing - reviewing and revising. All authors read the and approved the final version of the manuscript.

For a single author, use the following wording:

The author confirms sole responsibility for the following: conception and design of the study, collection of data, analysis and interpretation of the results, and preparation of the manuscript.

Acknowledgements

Contributors who do not meet all 4 of the criteria for authorship and, thus, cannot be listed as authors should be noted here.

Authors must disclose the use of generative AI and AI-assisted technologies in the writing process by adding a statement in *Acknowledgement section*

Examples:

The authors would like to express their gratitude and deep appreciation to "Name Surname" for their assistance in (conducting this study; writing this article; translation of the instructions, the text of the article, the list of references, statistical processing, etc.)

During the preparation of this work the author(s) used [NAME TOOL / SERVICE] in order to [REASON]. After using this tool/service, the author(s) reviewed and edited the content as needed and take(s) full responsibility for the content of the publication.

Disclaimers

An example of a disclaimer is an author's statement that the views expressed in the submitted article are his or her own and not an official position of the institution or funder.

Tables

Tables should be clearly constructed, named and placed in the text of the article.

The headings of the graphs should correspond exactly to their content.

All figures should be carefully verified, correspond to the figures in the text and must be statistically processed.

All explanations and interpretations of abbreviations should be placed in notes (footnotes), but not in the table title.

It should be noted which statistical indicators were used to represent the variability of the data, such as standard deviation (SD) or error of the mean (m).

Figure legends

Figures should be numbered consecutively according to the order in which they have been cited in the text.

In the manuscript, legends for illustrations should be on a separate page, with Arabic numerals corresponding to the illustrations.

IMPORTANT. Figures must be submitted as individual files named according to their number in the text. They cannot be embedded in the Word document.

Permissions

If figures or tables have already been published elsewhere previously, authors must acknowledge the original source and submit written permission from the copyright holder to reproduce it.
