**Introduction:** Replace these instructions with the text of your abstract. Do not delete the section break above. If you are including tables or figures, they must be imported into this file.

Please replace the headings with ones that are suitable for your abstract, but please ensure that the Statement of Status & Reasonable Completion and References remain unchanged. You may add additional headings if needed. Please limit your abstract to two pages A4 maximum and submitted as a pdf.

**Digital Formats:** Any image file format that can be imported into this file will be acceptable for publication. Please use smaller-format files whenever possible. Figures submitted separately will not be considered.

**Heading Styles:** The section heads in this template use the correct style (upper and lower case, bold, followed by a colon). The format for second-level heads is show below:

*Sample of a level-two head.* Automatic paragraph indents are imbedded into this template.

**Use of Meteorite Names:** All meteorites that are cited should have official names as seen in the [Meteoritical Bulletin Database](#). New meteorites without approved names will be considered on a case-by-case basis.

The full names of meteorites should be used in titles, subheadings, and at first mention in the text. Abbreviations may be used in tables and elsewhere.

This should include the current state of the project (e.g. pre-data collection, some data collected and so on), any additional data collection required to complete this study, and a brief statement on how you will be able to complete this manuscript within the next 12 months.
